selection at the transmission. Please note that the electronic gear selector on the instrument panel is unaffected by this failure and will continue to indicate the actual gear selected at the transmission. In the worst case, if proper parking procedures are not adhered to, and if the electronic gear selection indicator on the instrument panel indicates that the transmission is not in the Park "P" position due to linkage binding, the truck could roll away, causing a crash without warning.

The A/T shift control lever with replaced with a modified assembly. The procedure will be completed at no cost to you when performed by an Authorized Dealer or Parts and Service Center. The scheduled time for repair is approximately 1.9 hours.
