**OWNER SAFETY DEFECT NOTIFICATION:**

This notice is sent to you in accordance with requirements of the National Traffic and Motor Vehicle Safety Act and Transport Canada.

Damon a manufacturer of vehicles for the recreational vehicle industry has decided that a defect which relates to motor vehicle safety exists in certain Norcold gas/electric refrigerators and, as such, the vehicles equipped with these refrigerators. On July 22, 2002 Norcold announced and undertook a motor vehicle equipment safety recall to address a potential fatigue failure in cooling units made by Norcold serving as components in Norcold refrigerator model numbers 1200LR and 1200LRIM built from December 1, 1996 to February 28, 1999. Damon has determined that this recall should be extended to include cooling units serving as components in Norcold models 1200LR, 1200LRIM and 1201LRIM manufactured from March 1, 1999 to February 28, 2001. Each cooling unit under this extension has a serial number between 1008701 and 1273700, non-consecutively.

**Corrective action is required for the model numbers listed above if the serial number of the COOLING UNIT on your refrigerator falls between 1008701 and 1273700. Your vehicle may or may not have a refrigerator affected by this recall.** The cooling unit serial number is located on the solution chamber, which can be viewed through the refrigerator vent door on the outside of your vehicle. **The serial number on the cooling unit differs from the serial number of your refrigerator.** If your refrigerator is one of the models listed above, with a cooling unit serial number in the defined range, it has one of the suspect cooling units and requires **retrofitting with a thermal switch kit.** **Extended operation of a leaking cooling unit could cause a fire, resulting in personal injury (including death) and/or property damage. Call 800 767-9101 to report your refrigerator and get assistance to execute repair through a Norcold authorized service center or other approved dealer. Parts and labor for the repair will be at no charge.**

**If you have one of the recalled cooling units:**

1. **YOU should set the controls to "OFF," and unplug the refrigerator through the service vent on the outside of the vehicle.**
2. **YOU should immediately have a service center check to determine if there is a cooling unit leak.**
3. **If a cooling unit leak is detected by the authorized service center, you will be instructed to not operate the refrigerator in any mode until the cooling unit can be replaced.**
4. **If the cooling unit is not leaking, you will be instructed to not operate the refrigerator in any mode until it can be retrofitted with a Thermal Switch Kit.**

**If you do not have one of the recalled cooling units:**
