

**RE: BODY SERIAL
CHASSIS SERIAL**

Dear Owner:

This notice is being sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Our records indicate that you have purchased a vehicle with the serial number which appears above.

REASON FOR THIS RECALL

Winnebago Industries, Inc. has decided a safety defect exists where the affected vehicles were produced with a Vehicle Certification label that states the incorrect tire pressures. At the stated pressures, the tires are unable to support the 5,000-lb. front Gross Axle Weight Rating (GAWR) of the vehicle. The correct front tire pressures are 75 psi. The incorrect labels read 65 psi front tire pressures. The 225/75R16 tires can only support a front GAWR of 4,670 lbs. at the incorrectly stated pressures. Federal Motor Vehicle Safety Standard 120 requires that tires inflated to the pressure stated on the label must support the GAWR. Failure to follow proper vehicle loading specifications and tire inflation recommendations can result in tire damage and vehicle instability, which could result in a crash without prior warning.
