

SAFETY RECALL H29 – REPROGRAM WIRELESS IGNITION NODE

Dear: (Name)

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Chrysler has decided that some **2008 and 2009 model year Dodge Challenger** vehicles fail to conform to Federal Motor Vehicle Safety Standard (FMVSS) No. 114 – Theft Protection and Rollaway Prevention.

The problem is... **The Remote Keyless Entry (RKE) transmitters can be removed from your vehicle (VIN: xxxxxxxxxxxxxxxxx) when the transmission gear selector has not been placed in the "Park" position. If the driver turns the engine off but does not place the gear selector in the "Park" position, the vehicle could move inadvertently and cause a crash without warning.**

What your dealer will do... **Chrysler will repair your vehicle free of charge (parts and labor). To do this, your dealer will reprogram the Wireless Ignition Node and resynchronize your RKE transmitters. After this repair, the engine will only turn off when the transmission gear selector has been placed in the "Park" position.**

The new software will also correct an intermittent RKE condition and add a time-out feature to prevent draining the battery if the vehicle remains in the "Accessory" or "Run" mode for more than 30 minutes with the engine off. The work will take about ½ hour to complete. However, additional time may be necessary depending on service schedules.

What you must do to ensure your safety... **Simply contact your dealer right away to schedule a service appointment. Remember to bring this letter and BOTH RKE transmitters with you to your dealer.**

If you need help... If you have questions or concerns which your dealer is unable to resolve, please contact Chrysler at 1-800-853-1403.

Please help us update our records, by filling out the attached prepaid postcard, if any of the conditions listed on the card apply to you or your vehicle.
