Re: Certain Sunlite LQ Trailers

Dear Mr./Ms.

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Sundowner trailer has determined that a defect, which relates to motor vehicle safety, exists with the wiring harness on a limited number of Sunlite Living Quarter Trailers.

This is to notify you that, Sundowner Trailers, Inc. is initiating a volunteer recall of our Sunlite Living Quarter Trailers determined to be defective.

The individual trailers we are concerned with are not equipped with a fuse in line with the wire harness that connects to the tow vehicle. We have determined that if an improperly wired tow vehicle is connected to the trailer wiring harness there is a possibility of electrical short which could cause a fire resulting in property damage or injury to you and/or your stock.

We request that you please contact us at the following toll free number, 1-800-654-3879, Extension 2149. We will direct you to our nearest authorized Sundowner Dealership so that they can inspect your trailer. If it is one of the suspected trailers our dealership will install an in line fuse in your wire harness at no cost to you. We anticipate repair time to be approximately 1 hour.

Our utmost concern is for the safety of you our customer and your horses.

If you feel that Sundowner Trailers, Inc. has failed to comply with actions stated in this notification, please send your complaint to the following address:

**National Highway Traffic Safety Administration**
