

SAFETY RECALL NOTICE

AUTOCAR SAFETY RECALL A-0805 NHTSA RECALL 08V-566 November 2008

Dear Autocar Truck Owner:

This notice is being sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Autocar, LLC has decided that a defect which relates to motor vehicle safety exists in a total of 127 model-year 2008 and 2009 WX, WXL and ACX model heavy-duty class 8 vehicles built between 11 August 2008 and 02 October 2008, with serial numbers in the range 207542 through 208664.

MODELS AFFECTED: Autocar WX, WXL and ACX - 2008 and 2009

COMPONENTS AFFECTED: Steering shaft pinch bolt

SAFETY DEFECT: Insufficient torque was applied during the assembly process to the nut on the pinch bolt that secures the lower steering shaft to the steering gear box (See Figure 1 on page 2). Upon investigation it was found that the torque-controlled tool was calibrated to a lower torque rating than specified for the application.

POTENTIAL RISK: If the steering bolt were to loosen, the driver would experience loss of steering control.

PRECAUTIONS YOU CAN TAKE: Daily inspection of the fastener to make sure the nut on the pinch bolt that holds the lower steering shaft to the steering gear box is secure. The specified torque for the application is 69+/-6 Ft-lbs.

REPAIR REQUIRED: At no charge to you regardless of your truck's age or mileage, Autocar will correctly torque the nut on the punch bolt that secures the lower steering shaft to the steering gear box.

TIME REQUIRED FOR THE REPAIR: The labor time required to repair your truck is approximately 0.5 hours.

WHAT YOU SHOULD DO: Contact an Autocar dealer to schedule a service appointment to have your vehicle repaired. For further assistance, call Autocar at 877-973-3486 or 888-218-3611.
