Safety Recall: 08V-685
Service Advisory: 08-114

VIN: «VIN»

Dear «Owner_name»:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Keystone RV Company has decided that certain model 2008 Laredo 265RL Fifth Wheels fail to conform to the requirements of Part 567, "Certification." As a result, Keystone RV is conducting a safety recall. We apologize for any inconvenience this action may cause you; however your safety and continued satisfaction are of the utmost importance to us.

***Reason for
this recall***

On the vehicles subject to this recall, the Federal Identification Label and Tire and Loading Information Label does not contain the correct Gross Axle Weight Rating (GAWR). The label indicates a capacity of 6,000 lbs, but instead should read 5,080 lbs. Also the tire size and maximum inflation pressure is listed at 235/80/R16E at 80 psi and it should be 225/75/R15D at 65 psi maximum inflation. Loading the vehicle beyond the actual GAWR could result in poor vehicle handling characteristics, increasing the risk of a crash.

What we will do

We have enclosed the corrected labels to remedy the situation.

***What we need
you to do***

At your earliest convenience, apply the new Federal Identification Tag and Tire and Tire and Loading Information Label over top of the existing labels. If you require assistance installing the labels, please make an appointment with your dealer and bring the unit to the dealership and they will install the label at no cost to you.

***If you have
questions***
