Alex,

The front control module design involved in this recall is unique to Chrysler.

Phil

Chrysler Recall 08V-059

Phil,

Hello. We are looking into a February defect filing by Chrysler (08V-059) and found that Continental Automotive Systems was named as the supplier of the recalled part. Did Continental supply this part or similar parts with the same issue to any other vehicle manufacturer?

The referenced recall is attached.

Thank you,

Alex Ansley
