<b>Kit Contains:</b>	N/A
<b>Tools Required:</b>	N/A
<b>Additional Requirements:</b>	Acetone and shop rags

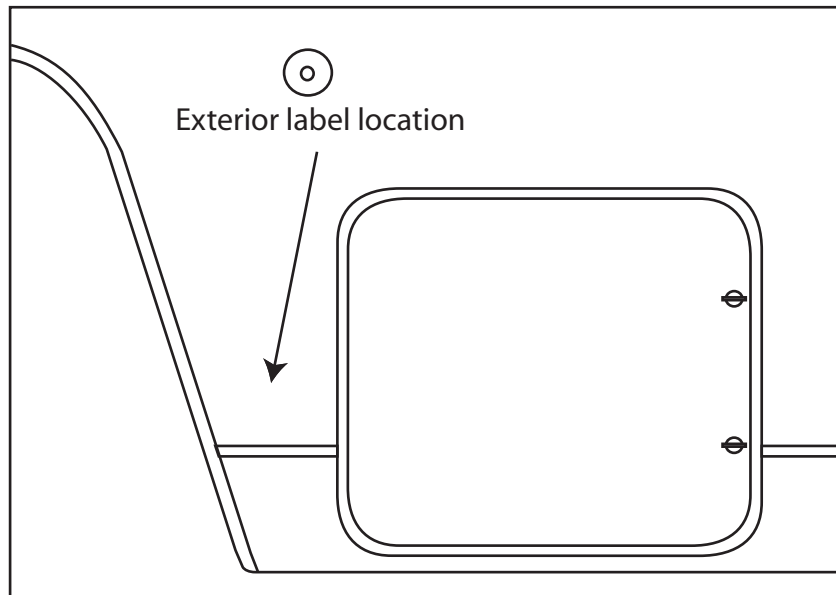

**Note:** All labels have been shipped to specific contacts made prior to release of this recall.

# Instructions

**NOTE: The Federal Certification label is white and the Federal CCC labels are yellow in color.**

1. Peel off the incorrect Federal Certification and Federal CCC labels from the driver's side exterior corner and discard them.

2. Use acetone to remove all adhesive residue from the trailer. Apply acetone with a cloth, using a circular motion.
3. Allow the surface to dry for approximately thirty (30) seconds.
4. Remove the protective back off the new Federal Certification label.

**WARNING: Once the new labels have come in contact with the trailer, do not attempt to remove or adjust it. If this occurs, the label will be permanently damaged and will not adhere to the trailer. If the label is damaged, a new label must be ordered.**

5. Align the new Federal Certification label just above the belt line trim and adhere the label to the trailer. Make sure to remove any air bubbles from the label.

- Repeat step 4 and 5 for the Federal CCC labels. These labels will be placed right above the Federal Certification label.

RECREATION VEHICLE TRAILER CARGO CARRYING CAPACITY

VIN: \_\_\_\_\_
