REMINDER NOTICE

Subject: SAF Holland ADL Suspension Transverse Beam Welds

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. This notice is also sent in accordance with the Canadian Motor Vehicles Safety Act.

Daimler Trucks North America LLC, on behalf of its wholly owned subsidiary, Freightliner Custom Chassis Corporation, has decided that a defect which relates to motor vehicle safety exists on specific Freightliner Custom Chassis XC motor home chassis manufactured between July 2, 2007 and October 30, 2007 with SAF Holland ADL suspensions.

Certain vehicles may have been built with SAF Holland suspensions that have improperly located transverse beam welds which may cause the transverse beam to separate from the suspension casting. If the transverse beam separates from the casting, vehicle stability while cornering could be affected, resulting in a loss of vehicle control and possible crash without prior warning.

The transverse beam welds will be inspected and, if the welds are improperly located, the transverse beam will be replaced.
