

June 17, 2009

Mr. Dan Smith
Associate Administrator for Enforcement
National Highway Traffic Safety Administration
Attention: Recall Management Division (NVS-215)
1200 New Jersey Avenue S.E.
Washington D.C. 20590

Subject: 000290 LED Light Kit Recall

Dear Mr. Smith:

Enclosed are documents relating to a voluntary recall of 000290 LED Light Kits in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Specialty Manufacturing Inc. (SMI) has determined that the 000290 LED Light Kit manufactured for the "Specialty" brand of School Bus Stop arms manufactured between March 31, 2008 and December 18, 2008, and Light Kits manufactured between Date Code J08030 and J08332 may be subject to reduced service life.

Please review the enclosed documentation and advise next steps. Should you have any questions, please contact me via phone at 704-889-7518, ext. 3028 or via e-mail at rusty.cloninger@smiglobal.net.

Best regards,

Rusty Cloninger
Director of Purchasing

Safety Defect and Noncompliance Report Guide for Equipment
PART 573 Defect and Noncompliance Report⁴

On June 1, 2009, Specialty Manufacturing, Inc. decided that (a defect which relates to motor vehicle safety)(a noncompliance with Federal Motor Vehicle Safety Standard No.) exists in items of motor vehicle equipment listed below, and is furnishing notification to the National Highway Traffic Safety Administration in accordance with 49 CFR Part 573 Defect and Noncompliance Reports.

Date this report was prepared: *June 15, 2009*

Furnish the manufacturer's identification code for this recall (if applicable): *N/A*

Identify the full corporate name of the fabricating manufacturer/brand name/trademark owner of the recalled item of equipment. If the recalled item of equipment is imported, provide the name and mailing address of the designated agent as prescribed by 49 U.S.C. §30164.

*Specialty Manufacturing, Inc.
10200 Pineville Road
Pineville, NC 28134*

Identify the corporate official, by name and title, whom the agency should contact with respect to this recall.

C. Bruce Emmett, Chief Operating Officer

Telephone Number: Fax No.: Name and Title of Person who prepared this report.

*Rusty Cloninger, Director of Purchasing 704-889-7518, ext. 3028
Archie England, Director of Engineering 704-889-7518, ext. 3117*

Signed: 

Each manufacturer must furnish a report, to the Associate Administrator for Safety Assurance, for each defect or noncompliance condition which relates to motor vehicle safety.

Mr. Dan Smith
Associate Administrator for Enforcement
National Highway Traffic Safety Administration
Attention: Recall Management Division (NVS-215)
1200 New Jersey Avenue S.E.
Washington D.C. 20590

This guide was developed from 49 CFR Part 573, "Defect and Noncompliance Reports" and also outlines information currently requested.

I. Identify the Recalled Items of Equipment

2. Identify the Items of Equipment Involved in this Recall, for each make and model or applicable item of equipment product line (provide illustrations or photographs as necessary to describe the item of equipment), provide:

Generic name of the item: *SMI SafetyGuard Stop Arms*

Make: *SMI*

Model: *All Stop Arm assemblies, sub-assemblies or kits containing 000290 LED Light Kits*

Part Number:
See Section II below.

Size: *N/A*

Function:
School Bus Safety Stop Arm

Other information which characterizes/distinguishes the items of equipment to be recalled:
See Section III below.

Identify the approximate percentage of the production of all the recalled models manufactured by your company between the inclusive dates of manufacture provided above, that the recalled model population represents.

II. Identifying the Recall Population

3. Furnish the total number of items of equipment recalled potentially containing the defect or noncompliance.

Model	Year	Number of Items Potentially Involved

		18,305

SMI will provide the agency with a list of final stage manufacturers and the number of stop arms purchased by each, when the list has been formulated.

Total Number Potentially Affected by the Recall:

4. Furnish the approximate percentage of the total number of items of equipment estimated to actually contain the defect or noncompliance:

Only 9,364 of the 18,305 suspect units are estimated to actually contain the defect. This is based upon the fact that only 12% or 1,219 of the 10,160 light kits shipped from April 1 through August 31, 2008 contained the suspect wiring. All light kits shipped between September 1 and December 18, 2008 (8,145) contain the suspect wiring.

*Total number estimated to actually contain defect: $(18,305 - 10,160) + (10,160 * 0.12)$*

Identify and describe how the recall population was determined--in particular how the recalled models were selected and the basis for the beginning and final dates of manufacture of the recalled items of equipment:

Testing at SMI and SMI's supplier confirmed a problem with the wiring from a particular sub-supplier for the 000290 LED Light Kit. A joint investigation between SMI and its supplier determined the specific dates that the wiring from this second wiring sub-supplier was partially or completely used in the production of 000290 LED Light Kits. Based upon the dates that this material was incorporated into the supply chain, SMI was able to pinpoint the dates of SMI stop arm assemblies that potentially contained suspect wiring.

The first shipment of 000290 LED Light Kits with suspect wiring from the second sub-supplier was delivered to SMI on March 31, 2008. Any stop arm assemblies produced after this date and before December 18, 2008 are considered suspect. During the period from April 1, 2008 through August 31, 2008, only 12% of the wiring used in the production of light kits was purchased by SMI's supplier from the second sub-supplier.

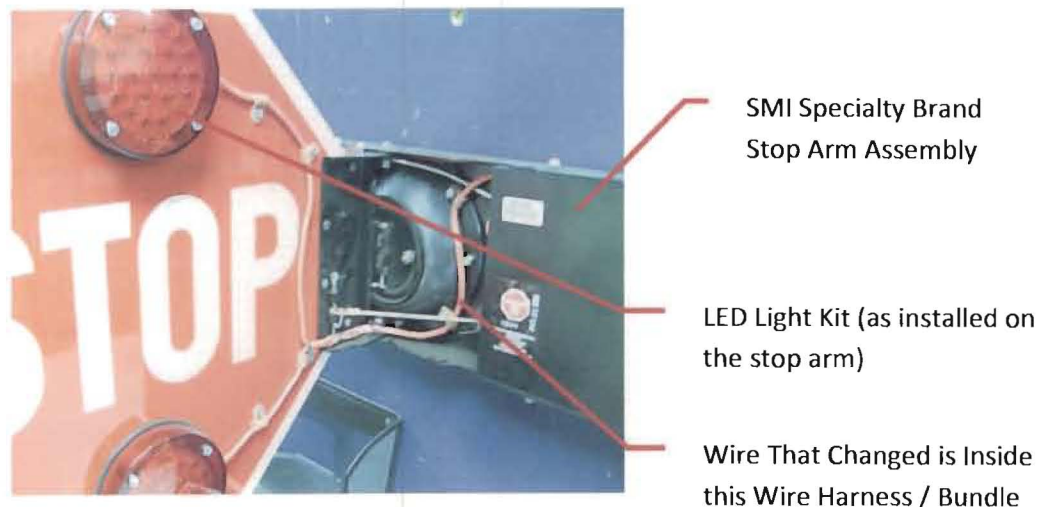

No 000290 LED Light Kits with suspect wiring were incorporated into SMI stop arm assemblies after December 18, 2008.

Utilizing the Item BOM Where Used Report in SMI's SyteLine ERP system, SMI established a listing of all stop assemblies containing the 000290 LED Light Kits. Cross referencing this list with 2008 sales data enabled SMI to determine the items, quantities and customers affected by this recall.

III. Describe the Defect or Noncompliance

5. Describe the defect or noncompliance. The description should address the nature and physical location of the defect or noncompliance. Illustrations should be provided as appropriate.

A change to the wire used in the LED light kits may reduce the effective life of the lights used on the Specialty brand of stop arms. This means that the lights may stop functioning prior to the warranty period of the stop arm. The wire is shown in the illustration below:

Describe the cause(s) of the defect or noncompliance condition.

A sub-supplier of the main LED light kit supplier to SMI changed the wiring material without notification or appropriate testing.

Describe the consequence(s) of the defect or noncompliance condition.

The LED lights on the stop arm assembly will not function (similar to an incandescent bulb burning out).

Identify any warning which can (a) precede or (b) occur.

There is no warning before this condition occurs.

If the defect or noncompliance is in a component or assembly purchased from a supplier, identify the supplier by corporate name and address.

SoundOff Signal, 3900 Central Parkway, Hudsonville, MI 49426

Identify the name and title of the chief executive officer or knowledgeable representative of the supplier:

*Mark Litke, Chief Executive Officer
Tom Grubba, National Sales Manager School Bus & Commercial Vehicle (Principal Contact)*

IV. Provide the Chronology in Determining the Defect/Noncompliance

6. With respect to a defect, furnish a chronological summary (including dates) of all the principle events that were the basis for the determination of the defect. The summary should include, but not be limited to, the number of reports, accidents, injuries, fatalities, and warranty claims.

Summary of Events:

12/19/08 Initial report from field of dissatisfaction with the longevity of an LED Light Kit
12/19/08 Visit to end user to review / No production at SMI facility for the holidays (12/19/08 to 1/5/09)
1/5/09 (First day after holiday shutdown) Issued an Internal Quality Alert to route the wire differently to reduce stress on the wire.
1/12/09 Review of next LED light shipment revealed that a change to the wire had occurred
1/13/09 Visit from the supplier for review of concern with wire change / Supplier starts investigating timeframe of the wire change with their supplier in China and begins testing to understand impact (Chinese New Year / Holidays Delay Responses)
1/16/09 First parts received of approved rework process (replacing the wire) / All Specialty brand LED stop arm assemblies manufactured after 12/18/08 included the reworked light kits
2/12/09 Received additional report from the field about LED light kit longevity
2/25/09 Received timeframe information from the supplier regarding the wire change
3/10/09 Visit from the supplier to discuss next steps
3/11/09 Received initial report from supplier regarding life testing
3/26/09 Visit from the supplier to start discussing details of the special warranty bulletin to ensure customer satisfaction
4/2/09 Update on lifecycle testing from supplier shows potential for reduced life of the parts / Full lifecycle testing would take much more time
4/23/09 Special Warranty Bulletin faxed to NHTSA per 49 CFR 579.5
5/1/09 Began distribution of Special Warranty Bulletin to SMI customers
5/6/09 Call from NHTSA asking for additional information
5/12/09 Additional warranty information sent to NHTSA
6/2/09 One of several discussions with NHTSA regarding possibility of converting Special Warranty Bulletin into a formal recall

Overall Information:

- Number of Customer Calls: 3
- Number of Accidents: NONE
- Number of Injuries: NONE
- Number of Fatalities: NONE

7. With respect to a noncompliance, identify and provide the test results or other data (in chronological order and including dates) on which the noncompliance was determined.

N/A

V. Identify the Remedy

8. Furnish a description of the manufacturer's remedy for the defect or noncompliance. Clearly describe the differences between the recall condition and the remedy.

It is recommended that the LED light kit on the stop arm be replaced.

Clearly describe the distinguishing characteristics of the remedy component/assembly versus the recalled component/assembly.

There is no visible, distinguishing characteristic between the two versions. The wire is internal to the wire bundle / harness (i.e. it is covered by a flexible jacket material). Light Kits replaced during under the SMI Special Warranty Bulletin and through this recall are identified by a 1/4" Black Shrink Tube Band or verified by the date code on the back of the lights.

Identify and describe how and when the recall condition was corrected in production. If the production remedy was identical to the recall remedy in the field, so state. If the product was discontinued, so state.

All products assembled after 12/18/08 contained LED light kits that included wiring that was of an approved and more durable material. This was initially accomplished by re-working of the light kits to replace the wire bundle. Eventually, the approved material was sent to the sub-supplier for initial inclusion into the assembly process.

VI. Identify the Recall Schedule

Furnish a schedule or agenda (with specific dates) for notification to other manufacturers, dealers/retailers, and purchasers. Please, identify any foreseeable problems with implementing the recall.

A Special Warranty Bulletin began distribution on 5/1/09 which recommended replacement of the LED light kits (see attached). After this revised notification to NHTSA, the included document will begin distribution on 6/17/09 to OEM customers first, followed shortly thereafter to the individual customers indicated in the section above.

VII. Furnish Recall Communications

9. Furnish a final copy of all notices, bulletins, and other communications that relate directly to the defect or noncompliance and which are sent to more than one manufacturer, distributor, or purchaser. This includes all communications (including both original and follow-up) concerning this recall from the time your company determines the defect or noncompliance

condition on, not just the initial notification. *A DRAFT copy of the notification documents should be submitted to this office by Fax (202-366-7882) for review prior to mailing.*

Note: These documents are to be submitted separately from those provided in accordance with Part 579.5 requirements.
