Subject: **Safety Recall 09C3**  
**EPA07 DD15 High Pressure Fuel Pump**

This notice is sent to you in accordance with requirement of the National Traffic and Motor Vehicle Safety Act. This notice is also sent in accordance with the Canadian Motor Vehicles Safety Act.

Detroit Diesel has decided that a defect which relates to motor vehicle safety exists in certain EPA07 DD15 engines equipped in Daimler Truck North America vehicles.

The bolts on the high pressure fuel pump will need to be inspected and determined if the bolts need to be re-torqued or if the high pressure fuel pump needs to be replaced. By inspecting, re-torquing or replacing will prevent fuel leaks which can result in a fire internal to the engine compartment.

Records available to us indicate that your vehicle is equipped with one of these affected engines. Detroit Diesel will repair your engine at no charge to you.

We ask that you take your unit to the closest Authorized Repair Facility to have the work performed. We estimate that the labor time required to perform this Safety Recall on your engine will range from 1.0 to 7.0 hours depending on the required repair.
