Subject: Sterling 360 Air Intake Duct Cushions

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. This notice is also sent in accordance with the Canadian Motor Vehicles Safety Act.

Daimler Trucks North America LLC, on behalf of its wholly owned subsidiary, Sterling Truck Corporation, has decided that a defect which relates to motor vehicle safety exists on specific Sterling 360 vehicles manufactured January 25, 2006, through November 30, 2008.

The weather resistance properties of certain engine air intake duct rubber cushions is insufficient. During normal vehicle operation, the cushions may deteriorate and crack, causing abnormal noise. In the worst case, all of the rubber cushions could crack and break, allowing the air intake duct to separate from the vehicle, resulting in a possible road hazard or vehicle crash.

The rubber engine air intake duct cushions will be replaced with more robust cushions.

Parts are now available for authorized dealers to order. Contact your authorized dealer to arrange to have the recall performed and to ensure that parts are available at the dealership.
