Subject: FCCC School Bus Chassis Brake Line Clamps

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. This notice is also sent in accordance with the Canadian Motor Vehicles Safety Act.

Daimler Trucks North America LLC, on behalf of its wholly owned subsidiary, Freightliner Custom Chassis Corporation, has decided that a defect which relates to motor vehicle safety exists on specific Freightliner Custom Chassis B2 school bus chassis (Thomas Built Buses Saf-T-Liner C2 school buses) manufactured October 9, 2007, through August 10, 2009, equipped with a Cummins ISB engine control unit, Bosch hydraulic pin-slide brakes, and Webasto 17k btu coolant heaters.

Some vehicles have a front right-hand crossover brake line that may have been secured using shorter offset clamps, potentially allowing the brake line to rub on surrounding components. Continued contact between the brake line and the surrounding components may lead to a loss of brake fluid and reduced brake performance, resulting in a vehicle crash without prior warning.

New clamps with a longer offset will be installed on the vehicle. The brake lines will be inspected for evidence of rubbing. Any damaged brake lines will be replaced. It is expected that only 10 percent of vehicles will require replacement of the brake lines.

Parts are now available for authorized dealers to order. Contact your authorized dealer to arrange to have the recall performed and to ensure that parts are available at the dealership.
