Subject: Fw: Chrysler Recall 09V-084 Supplier Inquiry

Hello Alex,

During the course of the investigation, it was determined that the position of the wiper motor (its location relative to the cowl screen, hood panel, etc.) and how water could thus contact the motor during vehicle operation was a significant factor in the likelihood of this issue to occur. Thus the same motor, if positioned in a different location or in another product, may not exhibit the same issue.

As far as a contact at Trico, try:

Dave Parker
Business Unit Director
248-371-8335

Let me know if anything additional is needed.

Best regards.

Subject Chrysler Recall 09V-084 Supplier Inquiry

Mr. Sak,

Good morning. In reference to Chrysler recall #09V-084 (attached), Chrysler's Defect Report noted Trico Products Corp as the supplier of the recalled equipment. Does Chrysler have a contact person with phone/email at Trico? We need to follow-up with them to ensure no other vehicle manufacturers received the same or similar equipment.

Thank you,

Alex Ansley
