Pursuant to Part 573 of Title 49 of the Code of Federal Regulations - Defect and Noncompliance Reports, Collins Bus Corporation is submitting information relating to a safety recall we are conducting. Specific information is as follows:

573.6(b)(1)

This is the 2nd quarterly report regarding Recall Number 09V-068

573.6(b)(2)

The initial notification began and completed February 27, 2009

573.6(b)(3)

This recall involves (four hundred and ninety) Collins Bantam, Collins Super Bantam, Mid-Bus Guide and Mid-Bus Super Guide vehicles built on Ford E-350 and Ford E-450 chassis, during the period of November 2007 through January 2009, at the South Hutchinson, Kansas assembly plant. Subsequent inspection of all available production vehicles with the same design revealed that two body bolts and associated hardware attaching the vehicle body to the chassis frame rails immediately behind the rear axle were consistently not installed, due to an undocumented process change that had been made. Customers were instructed to take their vehicles to a Collins Bus distributor for inspection and subsequent repairs if required. Bolts along with all associated hardware is being provided at no charge to the customer to complete necessary repairs.

573.6(b)(4)

To date, we have received confirmation that one hundred and four (104) of the buses have been inspected and repaired. Twenty one (21) buses have been inspected and need no repair, three (3) buses have been sold, and three hundred and sixty two (362) buses have not been confirmed.

573.6(b)(5)

To date, we have determined none of the buses to be unreachable for inspection.
