**2009 Mazda3 Dynamic Stability Control Compliance Recall 5509E
SUBSEQUENT NOTICE**

Dear Mazda Owner:

This notice is sent to you in accordance with the requirements of the National Highway Traffic and Motor Vehicle Safety Act.

In July 2009 you received a notice regarding Compliance Recall 5509E, 2009 Mazda3 Dynamic Stability Control (DSC) and that Mazda would notify you when parts became available to perform the final repair.

We are pleased to inform you that service parts are now available to complete the final repair of your vehicle.

What is Dynamic Stability Control?

The Dynamic Stability Control (DSC) automatically controls braking and engine torque in conjunction with systems such as ABS and TCS to help control side slip when driving on slippery surfaces, or during sudden or evasive maneuvering, enhancing vehicle safety.

What is the problem?

All 2009 Mazda3 vehicles equipped with Dynamic Stability Control (excluding MAZDASPEED3) fail to comply with FMVSS126, "Electronic Stability Control Systems", section S5.2.1 and S5.2.2. When tested per the procedure for FMVSS126, the yaw rate measured exceeded the test standards. Yaw rate is used by the module to measure side slip.

What will Mazda do?

Your Mazda dealer will replace the DSC control module with a modified one **free of charge**. The repair may take approximately an hour and a half to complete; however, it may take longer depending on the necessary repair and service workload at your Mazda dealership.

What should you do?

Mazda is concerned about your safety, and we encourage you to make an appointment with any authorized Mazda dealer to have the DSC control module replaced as soon as possible. You do not need to bring this notice to the dealer, but it may assist in the check-in process.
