REMINDER NOTICE

## Subject: KPPS Adjustable Brake Pedals

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Daimler Trucks North America LLC, on behalf of its wholly owned subsidiary, Freightliner Custom Chassis Corporation, has decided that a defect which relates to motor vehicle safety exists on specific Freightliner Custom Chassis B2 school bus chassis (Thomas Built Buses Saf-T-Liner C2 school buses) manufactured October 6, 2004, through November 12, 2009, and XC motorhome chassis manufactured March 6, 2007, through December 11, 2009, with certain Kongsberg Power Products Systems (KPPS) adjustable brake pedals. (Please note, there are also three SB shuttle bus chassis included in this recall.)

The adjustable brake pedal may loosen. The drive pin which secures the brake pedal arm to the balance of the assembly may become disengaged, this may cause a reduction in vehicle braking and/or cause the brake pedal to move out of position and interfere with throttle pedal function. A reduction in braking or interference with the throttle pedal could result in a vehicle crash.

A clamp assembly will be installed on the adjustable brake pedal arm, preventing it from loosening.
