The vehicles within the listed VIN breakpoints were produced from start of production for the 1999 model year through the 2010 model year ending with production on October 2, 2009. All other model year UD3300 are not involved.

3. 1166 vehicles

4. 100%

5. Vehicles within the listed VIN's do not meet 49 CFR 571.121, Section 5.1.2.1 Air Reservoir Tank Capacity. Operation of a vehicle with insufficient air tank reserve capacity may result in insufficient air supply to properly operate the brakes during repetitive brake applications. This may result in reduced braking performance which could result in a vehicle crash without prior warning to the vehicle operator.

6. Inapplicable

7. Air reservoir tank volume does not meet the FMVSS 121 regulation because the air tank volume was not increased for 1999 and later models to accommodate larger air brake chambers used with the 1999 and later models.

8. The intended remedial action for all subject vehicles will have the air reservoir tank volume increased to meet the FMVSS 121 requirements.

NDA will furnish the estimated dealer and owner notification dates with a supplemental Defect and Noncompliance Information Report at a later date.

9. All notices, bulletins, etc. will be provided to NHTSA.
10. A draft owner notification letter will be provided to NHTSA no less than five (5) business days prior to mailing to owners.
11. Nissan Diesel America, Inc. will notify NHTSA promptly if Nissan Diesel America, Inc. assigns a campaign number that differs from NHTSA's identification number.
