Safety Defect and Noncompliance Report Guide for Vehicles
PART 573 Defect and Noncompliance Responsibility and Reports ⁽¹⁾

On **October 30th, 2009** Ricon[MFR] decided that a defect which relates to motor vehicle safety exists in the motor vehicles listed below, and is furnishing notification to the National Highway Traffic Safety Administration in accordance with 49 CFR Part 573 Defect and Noncompliance Responsibility and Reports.

Date this report was prepared: **April 9th, 2010**

Furnish the manufacturer's identification code for this recall (if applicable): 09E-060

1. Identify the full corporate name of the fabrication manufacturer of the vehicle being recalled. If the recalled vehicle is imported, provide the name and mailing address of the designated agent as prescribed by 49 U.S.C. §30164.

Glaval Bus, A Division Of Forest River, Inc.

Identify the corporate official, by name and title, whom the agency should contact with respect to this recall.

Rob Froelich, Design Engineer

Telephone Number: **(574) 262-2212 ext. 3665** Fax Number: **(574) 264-9036**

Name and Title of Person who prepared this report:

Rob Froelich
Design Engineer

Signed:

A handwritten signature in blue ink that reads "R. Froelich".

⁽¹⁾ Each manufacturer must furnish a report, to the Associate Administrator for Enforcement, for each defect or noncompliance condition which relates to motor vehicle safety.

This guide was developed from 49 CFR Part 573, "Defect and Noncompliance Responsibility and Reports" and also outlines information currently requested. Any questions, please consult the complete Part 573 or contact Mr. George Person at (202) 366-5210 or by FAX at (202) 366-7882, or by E-Mail to RMD.ODI@dot.gov.

I. Identify the Vehicle Models Involved in the Recall

- 2. Identify the Vehicles Involved in the Recall, for each make and model or applicable vehicle line (provide illustrations or photographs as necessary to describe the vehicle), provide:

****Please see attached documentation labeled "Supplement Documentation"****

Make(s): _____ Model Years Involved: _____ Model(s): _____

Production Dates: Beginning _____ Ending: _____

VIN Range: Beginning: _____ Ending: _____

Vehicle Type: _____ Body style: _____

Descriptive information which characterizes/distinguishes the recalled vehicles from those model vehicles not included in the recall:

Make(s): _____ Model Years Involved: _____ Model(s): _____

Production Dates: Beginning _____ Ending: _____

VIN Range: Beginning: _____ Ending: _____

Vehicle Type: _____ Body style: _____

Descriptive information which characterizes/distinguishes the recalled vehicles from those model vehicles not included in the recall:

Make(s): _____ Model Years Involved: _____ Model(s): _____

Production Dates: Beginning _____ Ending: _____

VIN Range: Beginning: _____ Ending: _____

Vehicle Type: _____ Body style: _____

Descriptive information which characterizes/distinguishes the recalled vehicles from those model vehicles not included in the recall:

Identify the approximate percentage of the production of all the recalled models manufactured by your company between the inclusive dates of manufacture provided above, that the recalled model population represents. For example, if the recall involved Vehicles equipped with certain items of equipment from January 1, 1996 through April 1, 1997, then what was the percentage of the recalled Vehicles of all Vehicles manufactured during that time period.

Vehicles produced during recall timeline: 1981 _____

Vehicles involved in recall: 302 USA _____

Percentage of recalled vehicles vs. produced: 15.24% _____

II. Identify the Recall Population

- 3. Furnish the total number of vehicles recalled potentially containing the defect or noncompliance.

Vehicles Model	Year	Number of Potentially Involved
----------------	------	--------------------------------

****Please see attached documentation labeled "Supplement Documentation" ****

Total Number Potentially Affected by the Recall: 302

- 4. Furnish the approximate percentage of the total number of vehicles estimated to actually contain the defect or noncompliance: 100%

Identify and describe how the recall population was determined -- in particular how the recalled models were selected and the basis for the beginning and final dates of manufacture of the recalled vehicles:

Ricon supplied us with serial numbers of the lifts affected, which we then cross
referenced to our VIN's.

III. Describe the Defect or Noncompliance

5. Describe the defect or noncompliance. The description should address the nature and physical location of the defect or noncompliance. Illustrations should be provided as appropriate.

The lift is equipped with a restraint belt. The restraint belt has an interlock feature. The design is such that the lift will not operate if the tongue is not fully inserted and latch in the buckle. However, if the tongue is not fully inserted and latched in the buckle, the lift will operate. Though the design of the Ricon restraint buckle has not changed in many years, a forced change due to the discontinuation of the original switch used in the buckle may be at the root of the current issue. The current switch is taller and therefore, engages sooner resulting in an increase in the distance between the switch engagement and buckle latching point. The switch change occurred in December 2007.

Describe the cause(s) of the defect or noncompliance condition.

The operator does not fully engage the belt into the buckle. The lift can operate with the belt unlatched.

Describe the consequence(s) of the defect or noncompliance condition.

If the tongue is not fully latched in the buckle, the lift can operate and a wheelchair may not be adequately protected against movement.

Identify any warning which can (a) precede or (b) occur.

Failure to hear an audible click as the latching mechanism engages. If tugged the tongue will come out of the buckle.

If the defect or noncompliance is in a component or assembly purchased from a supplier, identify the supplier by corporate name and address.

Ricon Corporation, A Division of Vapor Bus International
7900 Nelson Road, Panorama City, CA 91402, USA

Identify the name and title of the chief executive officer or knowledgeable representative of the supplier:

Oscar Pardinias, Director Of Business Development and Communications

IV. Provide the Chronology in Determining the Defect/Noncompliance

If the recall is for a defect, complete item 6, otherwise item 7.

6. With respect to a defect, furnish a chronological summary (including dates) of all the principle events that were the basis for the determination of the defect. The summary should include, but not be limited to, the number of reports, accidents, injuries, fatalities, and warranty claims.

Ricon incorporated the design of an interlocked belt in May 1998, and continues to use it to date. Ricon has manufactured thousands of wheelchair lifts incorporating this interlocking belt design. The design works well when the operator ensures that the belt tongue is fully engaged and latched in the buckle. If the operator fails to fully engage and latch the belt tongue in the buckle, the lift will operate. The restraint belt design has been in use for almost 20 years. It goes directly from discontinuing the buckle in December 2007 to an individual rolling off the platform with no apparent connection. A switch component inside of the buckle was forced to change due to a discontinuance of the original switch in December 2007. The individual proceeded to roll off the end of the platform. This is the first and only reported incident of this type. On or about September 1, 2009, Ricon received a report that an individual in Austin, Texas, had powered backwards against the lift belt and the belt tongue came out of the buckle thus defeating the restraint belt. It is unknown whether or not the belt was fully engaged with the tongue latched inside the buckle.

7. With respect to a noncompliance, identify and provide the test results or other data (in chronological order and including dates) on which the noncompliance was determined.

The restraint belt and the interlock meet the requirement in 49CFR571.403 for a retention device. However, since the interlock operates correctly if the tongue is latched in the buckle, this is a safety-related defect, not a non-compliance.

V. Identify the Remedy

8. A description of the manufacturer's program for remedying the defect or noncompliance. This program shall include a plan for reimbursing an owner or purchaser who incurred costs to obtain a remedy for the problem addressed by the recall within a reasonable time in advance of the manufacturer's notification of owners, purchasers and dealers, in accordance with §573.13 of this part. A manufacturer's plan may incorporate by reference a general reimbursement plan it previously submitted to NHTSA, together with information specific to the individual recall. Information required by §573.13 that is not in a general reimbursement plan shall be submitted in the manufacturer's report to NHTSA under this section. If a manufacturer submits one or more general reimbursement plans, the manufacturer shall update each plan every two years, in accordance with §573.13. The manufacturer's remedy program and reimbursement plans will be available for inspection by the public at NHTSA headquarters.

Since Ricon believes that this condition is preventable, Ricon will embark on an educational campaign to raise awareness of this potential condition. All affected lifts will receive instructional and warning decals.

9. Furnish a description of the manufacturer's remedy for the defect or noncompliance. Clearly describe the differences between the recall condition and the remedy.
- a. Update all Operator manuals to alert operators to fully engage the belt tongue into the buckle with a "Click and Tug" on the belt prior to lift operation.
 - b. Affix a warning on the belt to "Click and Tug" prior to lift operation.
 - c. Edit operator's training video to include the "Click and Tug" campaign.

Identify and describe how and when the recall condition was corrected in production. If the production remedy was identical to the recall remedy in the field, so state. If the product was discontinued, so state.

Same as recall remedy.

VI. Identify the Recall Schedule

10. Furnish a schedule or agenda (with specific dates) for notification to other manufacturers, dealers/retailers, and purchasers. Please, identify any foreseeable problems with implementing the recall.

Glaval plans to mail the dealers/end users notice by postal mail the week of April 26th, 2010, dependant on when we receive approval from NHTSA.

11. Furnish Recall Communications

12. Furnish a final copy of all notices, bulletins, and other communications that relate directly to the defect or noncompliance and which are sent to more than one manufacturer, distributor, or purchaser. This includes all communications (including both original and follow-up) concerning this recall from the time your company determines the defect or noncompliance condition on, not just the initial notification. *A DRAFT copy of the notification documents should be submitted to this office by Fax (202-366-7882) for review prior to mailing.*

Note that these documents are to be submitted separately from those provided in accordance with Part 579.5 requirements.

We have not made any attempt to communicate with the dealers/end users without approval from NHTSA. We will contact them through the recall letter attached to this document for review.

USA Units

Ricon Recall 09E-060

Overview: Produced: 1,981 Production Timeline: December 2007 through December 2009 Model Year: 2006-2010 Models: Universal, Titan, Titan II, Primetime, Concorde II, Sport, Apollo Make: Chevy, GMC, Ford Freightliner
