Safety Defect and Noncompliance Report Guide for Vehicles
PART 573 Defect and Noncompliance Responsibility and Reports ⁽¹⁾

On **October 30th, 2009** Ricon[MFR] decided that a defect which relates to motor vehicle safety exists in the motor vehicles listed below, and is furnishing notification to the National Highway Traffic Safety Administration in accordance with 49 CFR Part 573 Defect and Noncompliance Responsibility and Reports.

Date this report was prepared: **April 9th, 2010**

Furnish the manufacturer's identification code for this recall (if applicable): 09E-061

1. Identify the full corporate name of the fabrication manufacturer of the vehicle being recalled. If the recalled vehicle is imported, provide the name and mailing address of the designated agent as prescribed by 49 U.S.C. §30164.

Glaval Bus, A Division Of Forest River, Inc.

Identify the corporate official, by name and title, whom the agency should contact with respect to this recall.

Rob Froelich, Design Engineer

Telephone Number: **(574) 262-2212 ext. 3665** Fax Number: **(574) 264-9036**

Name and Title of Person who prepared this report:

Rob Froelich
Design Engineer

Signed:

⁽¹⁾ Each manufacturer must furnish a report, to the Associate Administrator for Enforcement, for each defect or noncompliance condition which relates to motor vehicle safety.

This guide was developed from 49 CFR Part 573, "Defect and Noncompliance Responsibility and Reports" and also outlines information currently requested. Any questions, please consult the complete Part 573 or contact Mr. George Person at (202) 366-5210 or by FAX at (202) 366-7882, or by E-Mail to RMD.ODI@dot.gov.

I. Identify the Vehicle Models Involved in the Recall

- 2. Identify the Vehicles Involved in the Recall, for each make and model or applicable vehicle line (provide illustrations or photographs as necessary to describe the vehicle), provide:

****Please see attached documentation labeled "Supplement Documentation"*****

Make(s): _____ Model Years Involved: _____ Model(s): _____

Production Dates: Beginning _____ Ending: _____

VIN Range: Beginning: _____ Ending: _____

Vehicle Type: _____ Body style: _____

Descriptive information which characterizes/distinguishes the recalled vehicles from those model vehicles not included in the recall:

Make(s): _____ Model Years Involved: _____ Model(s): _____

Production Dates: Beginning _____ Ending: _____

VIN Range: Beginning: _____ Ending: _____

Vehicle Type: _____ Body style: _____

Descriptive information which characterizes/distinguishes the recalled vehicles from those model vehicles not included in the recall:

Make(s): _____ Model Years Involved: _____ Model(s): _____

Production Dates: Beginning _____ Ending: _____

VIN Range: Beginning: _____ Ending: _____

Vehicle Type: _____ Body style: _____

Descriptive information which characterizes/distinguishes the recalled vehicles from those model vehicles not included in the recall:

Identify the approximate percentage of the production of all the recalled models manufactured by your company between the inclusive dates of manufacture provided above, that the recalled model population represents. For example, if the recall involved Vehicles equipped with certain items of equipment from January 1, 1996 through April 1, 1997, then what was the percentage of the recalled Vehicles of all Vehicles manufactured during that time period.

Vehicles produced during recall timeline: 2201 _____

Vehicles involved in recall: 132 USA _____

Percentage of recalled vehicles vs. produced: 5.997% _____

II. Identify the Recall Population

- 3. Furnish the total number of vehicles recalled potentially containing the defect or noncompliance.

Vehicles Model	Year	Number of Potentially Involved
-------------------	------	-----------------------------------

**Please see attached documentation labeled "Supplement Documentation" **

Total Number Potentially Affected by the Recall: 132

- 4. Furnish the approximate percentage of the total number of vehicles estimated to actually contain the defect or noncompliance: 100%

Identify and describe how the recall population was determined -- in particular how the recalled models were selected and the basis for the beginning and final dates of manufacture of the recalled vehicles:

Ricon supplied us with serial numbers of the lifts affected, which we then cross referenced to our VIN's.

III. Describe the Defect or Noncompliance

5. Describe the defect or noncompliance. The description should address the nature and physical location of the defect or noncompliance. Illustrations should be provided as appropriate.

The defect is in the software loaded onto the printed circuit board that functions as the lift's control system. The anomaly is such that in the event an operator runs the wheelchair lift from the ground to vehicle floor level and releases the "UP" function switch before the floor level limit switch is activated, a remote possibility exists such that the lift may continue its upward travel for approximately one second before stopping. The continued upward travel may over-run the floor level cut off point and initiate platform stow resulting in the front of the platform tilting upward approximately 15 degrees if the combined weight of mobility aid and occupant is less than 100lbs. and the hydraulic system relief valve has not been altered from its original, factory setting.

Describe the cause(s) of the defect or noncompliance condition.

A combination of an anomaly in the software an the operator releasing the "UP" button prior to the wheelchair lift completing the function and coming to a stop at vehicle floor level.

Describe the consequence(s) of the defect or noncompliance condition.

When the platform overruns the vehicle floor level and stops at an angle from 15-20 degrees, it is possible for a person in a wheelchair to tip-over and for a standee to fall down.

Identify any warning which can (a) precede or (b) occur.

None

If the defect or noncompliance is in a component or assembly purchased from a supplier, identify the supplier by corporate name and address.

Ricon Corporation, A Division of Vapor Bus International

7900 Nelson Road, Panorama City, CA 91402, USA

Identify the name and title of the chief executive officer or knowledgeable representative of the supplier:

Oscar Pardinias, Director Of Business Development and Communications

IV. Provide the Chronology in Determining the Defect/Noncompliance

If the recall is for a defect, complete item 6, otherwise item 7.

6. With respect to a defect, furnish a chronological summary (including dates) of all the principle events that were the basis for the determination of the defect. The summary should include, but not be limited to, the number of reports, accidents, injuries, fatalities, and warranty claims.

Ricon introduced the S and K Series, L-model wheelchair lift on or about March. The lift incorporated new electronics to better manage all required functions. On or about September 1, 2009, Ricon received a report of an incident involving a Ricon S-Series, L-model lift, installed in a Champion bus, operated by Capital Metro Transit in Austin, Texas. The incident was caught on video. The video shows a passenger tipping over in her wheelchair as a result of the lift overrunning the vehicle floor level position. Ricon dispatched personnel to inspect the lifts and determined that a problem was present in the control system. This is the first and only reported incident of this type.

7. With respect to a noncompliance, identify and provide the test results or other data (in chronological order and including dates) on which the noncompliance was determined.

The failure is not covered under 49 CFR 571.403, therefore, there is not a non-compliance.

V. Identify the Remedy

8. A description of the manufacturer's program for remedying the defect or noncompliance. This program shall include a plan for reimbursing an owner or purchaser who incurred costs to obtain a remedy for the problem addressed by the recall within a reasonable time in advance of the manufacturer's notification of owners, purchasers and dealers, in accordance with §573.13 of this part. A manufacturer's plan may incorporate by reference a general reimbursement plan it previously submitted to NHTSA, together with information specific to the individual recall. Information required by §573.13 that is not in a general reimbursement plan shall be submitted in the manufacturer's report to NHTSA under this section. If a manufacturer submits one or more general reimbursement plans, the manufacturer shall update each plan every two years, in accordance with §573.13. The manufacturer's remedy program and reimbursement plans will be available for inspection by the public at NHTSA headquarters.

Upon determining the problem, Ricon stopped all shipments of L-model lifts. A letter was prepared and emailed to all bus OEM's notifying of the interruption in supply.

Ricon believes that this condition is preventable by merely depressing the button down until the "UP" function is completed and the platform has reached the vehicle floor level. This was not a foreseeable failure.

The software code is in the process of being re-written. Once the software code is completed and the software is validated, the code will be made available to upgrade all L-model wheelchair lifts in service.

9. Furnish a description of the manufacturer's remedy for the defect or noncompliance. Clearly describe the differences between the recall condition and the remedy.

Remedied Lifts:

- a. Update all Operator manuals to alert operators to depress the function buttons completely, until the selected function is completed and the lift comes to a stop.
- b. The updated software will be installed.

Recalled Lifts:

- a. The operational software allows the lift to overrun its selected function.

Identify and describe how and when the recall condition was corrected in production. If the production remedy was identical to the recall remedy in the field, so state. If the product was discontinued, so state.

A remedy has not been determined. The software code is being rewritten.

VI. Identify the Recall Schedule

10. Furnish a schedule or agenda (with specific dates) for notification to other manufacturers, dealers/retailers, and purchasers. Please, identify any foreseeable problems with implementing the recall.

Glaval plans to mail the dealers/end users notice by postal mail the week of April 26th, 2010, dependant on when we receive approval from NHTSA.

11. Furnish Recall Communications

12. Furnish a final copy of all notices, bulletins, and other communications that relate directly to the defect or noncompliance and which are sent to more than one manufacturer, distributor, or purchaser. This includes all communications (including both original and follow-up) concerning this recall from the time your company determines the defect or noncompliance condition on, not just the initial notification. *A DRAFT copy of the notification documents should be submitted to this office by Fax (202-366-7882) for review prior to mailing.*

Note that these documents are to be submitted separately from those provided in accordance with Part 579.5 requirements.

We have not made any attempt to communicate with the dealers/end users without approval from NHTSA. We will contact them through the recall letter attached to this document for review.

USA Units

Ricon Recall 09E-061

Overview:
