

Safety Defect and Noncompliance Report Guide for Vehicles
PART 573 Defect and Noncompliance Responsibility and Reports¹

On September 16, 2010, Eclipse Recreational Vehicles Inc. decided that a defect which relates to motor vehicle safety exists in the motor vehicles listed below, and is furnishing notification to the National Highway Traffic Safety Administration in accordance with 49 CFR Part 573 Defect and Noncompliance Responsibility and Reports.

Date this report was prepared: 19 October 2010

Furnish the manufacturer's identification code for this recall (if applicable): N/A

1. Identify the full corporate name of the fabricating manufacturer of the vehicle being recalled. If the recalled vehicle is imported, provide the name and mailing address of the designated agent as prescribed by 49 U.S.C. §30164.

Eclipse Recreational Vehicles Inc
3016 Kansas Ave
Riverside CA 92507

Identify the corporate official, by name and title, whom the agency should contact with respect to this recall.

Danny Zacarias, Service Manager / Operations Manager

Telephone Number: 951-684-6868 **Fax No.:** 951-684-4449

Name and Title of Person who prepared this report.

Danny Zacarias, 35 Series Range Campaign Manager

Signed:

¹ Each manufacturer must furnish a report, to the Associate Administrator for Enforcement, for each defect or noncompliance condition which relates to motor vehicle safety.

I. Identify the Vehicle Models Involved in the Recall

2. Identify the Vehicles Involved in the Recall, for each make and model or applicable vehicle line (provide illustrations or photographs as necessary to describe the vehicle), provide:

Descriptive information which characterizes/distinguishes the recalled vehicles from those model vehicles not included in the recall:

This is a cooking range installed for the recreational vehicle. This unit has a cooktop with two 6,500 BTU burners and one 9,000 BTU burner. The oven has a 7,100 BTU burner. The oven box comes in 2 sizes: 17” and 21”. The “open well” and “sealed” references refer to the burner design. The suffixes refer to the product finish.

In summary the recall relates to a gas feed-tube for the oven that is common to all Range/Oven combos in the 35 Series. Ranges also come without the oven box. These units do not use this gas line and are not subject to recall

Identify the approximate percentage of the production of all the recalled models manufactured by your company between the inclusive dates of manufacture provided above, that the recalled model population represents. For example, if the recall involved Vehicles equipped with certain items of equipment from January 1, 1996 through April 1, 1997, then what was the percentage of the recalled Vehicles of all Vehicles manufactured during that time period.

The 35 series is a new range product, produced by Atwood, and went into production by Atwood on July 1, 2010. 100 % of the Range / Oven Combo units built through September 20, 2010 are subject to recall. Eclipse started to receive this 35 Series Range on August 29, 2010.

II. Identify the Recall Population

3. Furnish the total number of vehicles recalled potentially containing the defect or noncompliance.

Model	Year	Number of Vehicles Potentially Involved
Attitude	2011	55
Milan	2011	63
Stellar	2011	34

Total Number Potentially Affected by the Recall: 152

4. Furnish the approximate percentage of the total number of vehicles estimated to actually contain the defect or noncompliance: 0.001%

Identify and describe how the recall population was determined--in particular how the recalled models were selected and the basis for the beginning and final dates of manufacture of the recalled vehicles:

100% of the 35 series range / Oven Combo units used in our product through September 20, 2010 are included in the recall

III. Describe the Defect or Noncompliance

5. Describe the defect or noncompliance. The description should address the nature and physical location of the defect or noncompliance. Illustrations should be provided as appropriate.

A small fracture has been found within the line supplying gas to the oven box. Such a fracture has the potential to leak gas when the oven box is in operation.

Describe the cause(s) of the defect or noncompliance condition.

Our current understanding is that the initial aluminum tube billet lacks integrity. This billet is drawn into tubes in which cracks have been identified

Describe the consequence(s) of the defect or noncompliance condition.

Gas only flows through the suspect tube when the oven thermostat valve is opened and the thermocouple signals that a pilot light is present in the oven box. Once gas is flowing, it can leak through the wall of the fractured gas line leading to a potential build up of gas in the RV. In the presence of a spark or other ignition source, this may lead to a fire. This condition may also pose risk of asphyxiation.

Identify any warning which can (a) precede or (b) occur.

In the event of an actual fracture in the gas supply line: the Lp Detector in the coach should sound, the consumer will potentially smell the LP gas, and the consumer might hear gas escaping through the leak.

If the defect or noncompliance is in a component or assembly purchased from a supplier, identify the supplier by corporate name and address.

The 35 series Range / Oven Combo is purchased from:

Atwood Mobile Products
12155 Magnolia Ave
Riverside CA 92503

Identify the name and title of the chief executive officer or knowledgeable representative of the supplier:

Janice Orłowski, 35 Series Quality Campaign Manager

IV. Provide the Chronology in Determining the Defect/Noncompliance

If the recall is for a defect, complete item 6, otherwise item 7.

6. With respect to a defect, furnish a chronological summary (including dates) of all the principle events that were the basis for the determination of the defect. The summary should include, but not be limited to, the number of reports, accidents, injuries, fatalities, and warranty claims.

Problem discovered at the Atwood Greenbrier manufacturing facility, specifically, during a regular quality and leak check during the Atwood manufacturing process, a charged burner supply tube ignited and was determined to be fractured – There have been no accidents, injuries, fatalities or warranty claims to date.

7. With respect to a noncompliance, identify and provide the test results or other data (in chronological order and including dates) on which the noncompliance was determined.

V. Identify the Remedy

8. A description of the manufacturer's program for remedying the defect or noncompliance. This program shall include a plan for reimbursing an owner or purchaser who incurred costs to obtain a remedy for the problem addressed by the recall within a reasonable time in advance of the manufacturer's notification of owners, purchasers and dealers, in accordance with §573.13 of this part. A manufacturer's plan may incorporate by reference a general reimbursement plan it previously submitted to NHTSA, together with information specific to the individual recall. Information required by §573.13 that is not in a general reimbursement plan shall be submitted in the manufacturer's report to NHTSA under this section. If a manufacturer submits one or more general reimbursement plans, the manufacturer shall update each plan every two years, in accordance with §573.13. The manufacturer's remedy program and reimbursement plans will be available for inspection by the public at NHTSA headquarters.

Atwood has initiated a 100% examination of the gas supply tube. Uninstalled units are connected to an LP gas supply. The pilot light in the oven box is lit. The oven thermostat valve is opened and the range burner then ignites. With gas flowing through the supply tube, the length of the tube is “wanded” with an open flame. If there is any gas leaking from the supply tube, the open flame will ignite it. Any affected unit is then immediately quarantined and the stock is swapped out with good product.

Units installed in RV, the burner assembly is removed from the gas supply in the oven box, and the other end of the gas supply line is removed from the gas manifold. A cap is placed on the one end of the gas supply line and integrated meter/pump is attached to the other end. With the use of supplied pressure apparatus to apply

pressure and monitor for leaks. Absent a drop in pressure, the unit is re-assembled and tested for leaks. In the event of a pressure leak, the RV unit is quarantined until a replacement range can be installed.

Clearly describe the distinguishing characteristics of the remedy component/assembly versus the recalled component/assembly.

Future shipments will not be built with fractured gas supply lines to the oven box.

Identify and describe how and when the recall condition was corrected in production. If the production remedy was identical to the recall remedy in the field, so state. If the product was discontinued, so state.

The production remedy is identical to the at source – in production recall remedy. The product has not been discontinued

VI. Identify the Recall Schedule

10. Furnish a schedule or agenda (with specific dates) for notification to other manufacturers, dealers/retailers, and purchasers. Please, identify any foreseeable problems with implementing the recall.

October 4, 2010 – A safety letter was sent out to our dealers and retails with instructions that the oven box is not to be lit or used until the Range / Oven Combo has been checked.

Future actions are being taken in coordination with the programs of the QEM

October 22, 2010 – Owners will be notified

VII. Furnish Recall Communications

11. Furnish a final copy of all notices, bulletins, and other communications that relate directly to the defect or noncompliance and which are sent to more than one manufacturer, distributor, or purchaser. This includes all communications (including both original and follow-up) concerning this recall from the time your company determines the defect or noncompliance condition on, not just the initial notification. A DRAFT copy of the notification documents should be submitted to this office by Fax (202-366-7882) or by E-Mail to RMD.ODI@dot.gov for review prior to mailing.

Note that these documents are to be submitted separately from those provided in accordance with Part 579.5 requirements.
