

Safety Defect and Noncompliance Report Guide for Equipment
PART 573 Defect and Noncompliance Report¹

On 1 October, 2010, Prime Time Manufacturing division of Forest River, Inc. was notified by Atwood Mobile Products LLC of a potential defect which relates to motor vehicle safety in items of motor vehicle equipment listed below, and is furnishing notification to the National Highway Traffic Safety Administration in accordance with 49 CFR Part 573 Defect and Noncompliance Reports.

Date this report was prepared: 28 October 2010

Furnish the manufacturer's identification code for this recall (if applicable): 10E-046 _____

1. Identify the full corporate name of the fabricating manufacturer/brand name/trademark owner of the recalled item of equipment. If the recalled item of equipment is imported, provide the name and mailing address of the designated agent as prescribed by 49 U.S.C. §30164.

Prime Time Manufacturing

66149 SR. 19

Wakarusa, IN. 46573

Identify the corporate official, by name and title, whom the agency should contact with respect to this recall. - Brandon York, Director of Customer Service

Telephone Number: 574-862-3033

Fax No.: 574-970-6805

Name and Title of Person who prepared this report.

Brandon York, Director of Customer Service

¹Each manufacturer must furnish a report, to the Associate Administrator for Enforcement, for each defect or noncompliance condition which relates to motor vehicle safety.

This guide was developed from 49 CFR Part 573, "Defect and Noncompliance Reports" and also outlines information currently requested. Any questions, please consult the complete Part 573 or contact Ms. Jennifer Timian at (202) 366-5210, by FAX at (202) 366-7882, or E-Mail to RMD.ODI@dot.gov.

Identify the approximate percentage of the production of all the recalled models manufactured by your company between the inclusive dates of manufacture provided above, that the recalled model population represents. For example, if the recall involved Equipment equipped with certain items of equipment from January 1, 1996, through April 1, 1997, then what was the percentage of the recalled Equipment of all Equipment manufactured during that time period?

The 35 series is a new Atwood range product line that went into production on July 1, 2010. 100% of the Range / Oven Combo units built through September 20, 2010 are subject to recall.

II. Identifying the Recall Population

3. Furnish the total number of items of equipment recalled potentially containing the defect or noncompliance.

Model – RV1735	Year – 2010	Number of Items Potentially Involved – 511
-----------------------	--------------------	---

Total Number Potentially Affected by the Recall: 337- the potentially involved and affected numbers are different because: the manufacturer did not properly note a change of serial numbers. Atwood shows 337 ranges that were sent with the recalled model of RV1735 since the manufacturer didn't properly note the change we have to send out possible recall notices for every unit that was built during this time period.

4. Furnish the approximate percentage of the total number of items of equipment estimated to actually contain the defect or noncompliance: Approximately 0.014%

Identify and describe how the recall population was determined--in particular how the recalled models were selected and the basis for the beginning and final dates of manufacture of the recalled items of equipment:

100% of the 35 series Range / Oven Combo units produced through September 20, 2010 are included in the recall population.

III. Describe the Defect or Noncompliance

5. Describe the defect or noncompliance. The description should address the nature and physical location of the defect or noncompliance. Illustrations should be provided as appropriate.

A small fracture has been found within the line supplying gas to the oven box. Such a fracture has the potential to leak gas when the oven box is in operation.

Describe the cause(s) of the defect or noncompliance condition.

Our current understanding is that the initial aluminum tube billet lacks integrity. This billet is drawn into tubes in which cracks have been identified.

Describe the consequence(s) of the defect or noncompliance condition.

Gas only flows through the suspect tube when the oven thermostat valve is opened and the thermocouple signals that a pilot light is present in the oven box.

Once gas is flowing, it can leak through the wall of the fractured gas line leading to a potential build up of gas in the RV. In the presence of a spark or other ignition source, this leak may lead to a fire. This condition may also pose risk of asphyxiation.

Identify any warning which can (a) precede or (b) occur.

In the event of an actual fracture in the gas supply line:

- The LP detector in the coach should sound
- The consumer will potentially smell the LP gas
- The consumer might hear gas escaping through the leak.

If the defect or noncompliance is in a component or assembly purchased from a supplier, identify the supplier by corporate name and address.

The gas line is part of an assembly purchased from

NINGBO JINOUE HARDWARE CO., LTD
No.69 Xiaogang Weiliu Road
Beilun Area
Ningbo City Zhejiang Province
China 315803

Identify the name and title of the chief executive officer or knowledgeable representative of the supplier:

General Manager: Burgess Chang

IV. Provide the Chronology in Determining the Defect/Noncompliance

If the recall is for a defect, complete item 6, otherwise item 7.

6. With respect to a defect, furnish a chronological summary (including dates) of all the principle events that were the basis for the determination of the defect. The summary should include, but not be limited to, the number of reports, accidents, injuries, fatalities, and warranty claims.

Problem was discovered by Atwood on 9-16-10

Atwood notified Prime Time on the identified problem and immediately ceased use of the ovens on affected units. 9-24-10

Atwood certified all units in the yard on 9-29-10 and 9-30-10

There have been no accidents, injuries, fatalities or warranty claims to date.

7. With respect to a noncompliance, identify and provide the test results or other data (in chronological order and including dates) on which the noncompliance was determined.

V. Identify the Remedy

8. Furnish a description of the manufacturer's remedy for the defect or noncompliance. Clearly describe the differences between the recall condition and the remedy.

AT SOURCE/IN PRODUCTION:

All units have been inspected and certified by Atwood which are here at the Prime Time facility in Wakarusa. This was a 100% examination that currently trained Atwood personnel have been provided with tools and measuring equipment to inspect all the RV units on the Prime Time production lines or in Prime Time's lots awaiting shipment.

IN THE FIELD

Units installed in RVs will be facilitated by Atwood on proper repair.

In most cases there is no easy access to the oven box gas supply line once the unit is installed. The test procedure is therefore as follows:

- 1) The burner assembly is removed from the gas supply line in the oven box.
- 2) The other end of the gas supply line is removed from the gas manifold.
- 3) A cap is placed on one end of the gas supply line and an integrated meter/pump is attached to the other end.
- 4) Use supplied pressure apparatus to apply pressure and monitor for leaks. Absent a drop in pressure, the unit is re-assembled and tested for leaks.
- 5) In the event of a pressure leak, the RV unit is quarantined until a replacement range can be installed.

For units that were supplied to distributors or dealers, these stocks will be exchanged or tracked down for dealer testing.

For a), b) and c) units, a record of every tested Range / Oven Combo serial number is being logged and each good unit is marked with a green check mark.

Dealer service technicians will be supplied with work instructions, a video and the appropriate tools to replicate the test in b) on units in dealer lots and on units already delivered to customers.

Clearly describe the distinguishing characteristics of the remedy component/assembly versus the recalled component/assembly.

Future shipments leaving Prime Time's facility will not be built with fractured gas supply lines to the oven box.

Identify and describe how and when the recall condition was corrected in production. If the production remedy was identical to the recall remedy in the field, so state. If the product was discontinued, so state.

The Production remedy is identical to the AT SOURCE/IN PRODUCTION recall remedy.

The product has not been discontinued

VI. Identify the Recall Schedule

Furnish a schedule or agenda (with specific dates) for notification to other manufacturers, dealers/retailers, and purchasers. Please, identify any foreseeable problems with implementing the recall.

15 October 2010 - A formal documented spreadsheet will be given to Atwood of dealers and retail customer listings of all affected units. Atwood will send out all necessary items to complete recall 100%.

VII. Furnish Recall Communications

9. Furnish a final copy of all notices, bulletins, and other communications that relate directly to the defect or noncompliance and which are sent to more than one manufacturer, distributor, or purchaser. This includes all communications (including both original and follow-up) concerning this recall from the time your company determines the defect or noncompliance condition on, not just the initial notification. A *DRAFT* copy of the notification documents should be submitted to this office by Fax (202-366-7882) or by E-Mail (RMD.ODI@dot.gov) for review prior to mailing.

Note: These documents are to be submitted separately from those provided in accordance with Part 579.5 requirements.
