Dear Mazda Dealer:

Mazda Motor Corporation has decided to renotify customers who have not responded to the 2007-2009 Mazda3 and Mazda5 Power Steering Voluntary Safety Recall 6010H as of September 21, 2011. Owners of subject vehicles will be asked to return their vehicles to a Mazda dealer to complete the recall repair.

In September 2010, Mazda Motor Corporation launched a Safety Recall Campaign on certain 2007-2009 Mazda3 and Mazda5 vehicles which may experience sudden loss of power steering assist while driving the vehicle. If power steering assist is lost, steering is still possible but will require more physical effort, particularly while driving at lower speeds. Unless the driver compensates for the additional effort, the risk of a crash is increased.

The fourth notification letter was mailed to customers yesterday, **September 29, 2011**.

Please refer to MS3 or eMDCS for Repair Procedure and other campaign information.

Important Safety Notice: The National Traffic and Motor Vehicle Safety Act prohibits selling or leasing any subject vehicles without performing the necessary repair for defects or failures. Failure to perform applicable recalls before delivery can result in extensive dealer fines and penalties from the Federal Government. Therefore, you must complete this recall for all affected vehicles in your inventory prior to delivery.

Parts information, warranty information, and inspection and repair procedures are available on MS3 and eMDCS websites.

Please make certain that the appropriate personnel in your dealership are aware of these resources and are familiar with the details of this recall before responding to customer inquiries. If you have any questions, please contact your region manager or DSM.

We apologize for any inconvenience this recall may cause you and your customers. Your understanding and support in carrying out this campaign is greatly appreciated

Sincerely,

Kiyoshi Yagi
Director, Technical Services
Mazda North American Operation
