OWNER NOTIFICATION

Dear Nissan cube® owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Nissan has decided that the Model Year 2009 2010 Nissan cube® fails to conform to one of the requirements set forth in Federal Motor Vehicle Safety Standard (FMVSS) No. 301. Our records indicate that you own or lease the Nissan vehicle identified by the VIN on the cover of this notice.

Reason for Recall

A test was recently conducted on the cube® where the vehicle was struck from behind at approximately 50 mph. There was no fuel leakage immediately after the impact. However, after the vehicle was rotated onto its side, there was some fuel leakage from the fuel filler recirculation tube. The amount of fuel that leaked was greater than the maximum allowed by the standard. If the fuel leakage occurs in a crash and is in close proximity to an ignition source, it could result in a fire.

What Nissan Will Do

To address this issue, your Nissan dealer will install a special protector on the fuel filler recirculation tube. This free service should take less than an hour to complete, but your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.

What You Should Do

Contact your Nissan dealer as soon as possible in order to arrange an appointment to have your vehicle repaired. Please bring this notice with you when you keep your service appointment. Instructions have been sent to your Nissan dealer.

If the dealer fails, or is unable to make the necessary repairs free of charge, you may contact the National Consumer Affairs Department, Nissan North America, Inc. P.O.
