Transport Canada Safety Recall I.D. Number: TC 2010-255

Summary of Procedure: On the above referenced models it is necessary to secure the throttle cables to the frame above the radiator.

Dear Ducati Owner,

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act & Transport Canada.

Ducati Motor Holding S.P.A. has decided that a defect that relates to motor vehicle safety exists in certain model year 2010 Multistrada 1200 (all versions) motorcycles. Our records indicate that you are the owner of a Ducati motorcycle affected by this safety recall campaign. Please take the time to read this letter and help us take the appropriate steps to ensure that your vehicle is operating properly.

Ducati Motor Holding S.P.A. has determined that the throttle cables may come into contact with the upper edge of the radiator during normal operation of the motorcycle. This situation could cause the throttle cables to become chafed by the radiator resulting in damage to the motorcycle and a potential hazard to the rider. Any damage to the cables could adversely affect the motorcycle's throttle operation and thereby increase the risk of a crash. To correct this condition, your authorized Ducati dealer will secure the throttle cables to the frame above the radiator to prevent contact. The Dealer will perform this modification at no cost to you for parts and labor.

We request that you contact your authorized Ducati dealer and schedule an appointment, so that the required service can be performed without delay. To locate your nearest authorized Ducati dealer, please go to www.ducatiusa.com and select the "dealer locator" or you may call toll free from the U.S. 800-231-6696. Your dealer can complete the required service in under an hour, if you have an appointment. If your dealer has a number of vehicles awaiting service, additional time may be required.

Precautions - If you are not the only rider of this motorcycle, please advise all other riders of this important information. You may continue to ride this motorcycle; however, if you chose to do so, do not leave this problem unattended.
