

**RE: BODY SERIAL
CHASSIS SERIAL**

Dear Owner:

This notice is being sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Our records indicate that you have purchased a vehicle with the serial number which appears above.

REASON FOR THIS RECALL

The motor vehicles potentially containing the defect are on certain: 2011 Model Year Winnebago® (Model: Vista® E35F) and 2011 Model Year Itasca® (Model: Sunstar® E35F). These motor homes were manufactured March 16, 2010 through August 12, 2010.

These vehicles may have the potential for a cable that powers the slideout room to make contact with the driveshaft when the slideout is retracted. If this cable makes contact with the driveshaft, it could wear the protective jacket and insulation off the cable exposing the conductors to the driveshaft and energizing the chassis, which could result in personal injury or death.

WHAT WE WILL DO

Winnebago Industries, Inc. dealers will correct this situation at no charge to you by: 1. Checking to assure the wire harness is not damaged and replace, if necessary. 2. Installing the driveshaft close-out panel to protect and support the wire harness.
