

Safety Recall Notice

Goshen Coach GC II

Dear Customer:

This **Safety Recall Notice** is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act and is important for your safety.

Goshen Coach decided that a defect which relates to motor vehicle safety exists in certain *GC II* buses manufactured between May 2006 and May 2007. Other bus models manufactured by Goshen Coach, Inc. during this time period are not included in this recall.

Vehicles subject to this recall campaign were manufactured with Trans Air TA 73 evaporators. The evaporator utilizes a power resistor to regulate blower speed. Should a short occur in the "low or medium speed" circuit while the blower is in high speed, the short will cause the supply voltage to feedback through the resistor to ground, not drawing enough current to trip the fuse, but causing the resistor temperature to rise to a point where it will melt and possibly ignite the plastic blower housing to which it is mounted. The overheating can result in a fire.

What We Will Do

Goshen Coach in cooperation with Trans Air will install a thermal shutdown device in series with the speed resistors. The repair will be done at no cost to you.

What You Should Do

You are to contact the nearest Goshen Coach dealer or repair facility to schedule an immediate inspection of your bus. You can also contact Trans Air directly at 1-800-673-2446.
