IMPORTANT SAFETY RECALL REMINDER

Ford Motor Company would like to remind you that your 2010 Ranger needs to have the following no charge recall(s) completed.

You received this notice because our records, which are based primarily on state registration and title data, indicate that you are the current owner.

Recall Number 10S12 - Right Rear Parking Brake Actuator and Description:

What is the Issue: On your vehicle, it is possible for the parking brake cable to become disconnected from the right rear actuator during cold weather. This may occur when the parking brake is released if wet parking brake shoes have frozen in the applied position. Should the right rear parking brake cable become disconnected, the pedal will have extended travel and may not fully apply the parking brake. A manual transmission vehicle parked in neutral without a fully applied parking brake may have unintended movement which may cause a crash.

What Are We Asking You To Do? Please contact your dealer to schedule an appointment to have this important service procedure completed. If you do not already have a servicing dealer, you can access www.Fordowner.com for dealer addresses, maps and driving instructions.
