Dear Toyota Owner:

This notice is being sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Toyota has decided that a defect, which relates to motor vehicle safety, exists in the Engine Control Module (ECM) for certain 2005 through 2008 Toyota Corolla and Corolla Matrix models equipped with the 1ZZ-FE engine and two-wheel drive. Our records indicate that you own a vehicle that has not yet had this condition corrected.

What is the condition?

The ECM for certain 2005 through 2008 Toyota Corolla and Corolla Matrix models equipped with the 1ZZ-FE engine and two-wheel drive may have been improperly manufactured. There is a possibility that a crack may develop at certain solder points or on varistors on the circuit board. In most cases, if a crack occurs at certain points or on certain varistors, the engine warning lamp could be illuminated*, harsh shifting could result, or the engine may not start. In limited instances, if cracking occurs on particular solder points or varistors, the engine could stop while the vehicle is being driven which may increase the risk of a crash.

**Please note the engine warning lamp may illuminate for reasons unrelated to this condition.*

What is Toyota going to do?

The replacement part for your vehicle is available. Any Toyota dealer will inspect the part number and the lot number located on the ECM. If the ECM is found to be one that requires replacement, the dealer will do so at **NO CHARGE** to you.
