

April 26, 2011

Mr. Claude Harris
Acting Associate Administrator for Enforcement
National Highway Traffic Safety Administration
Recall Management Division (NVS-215)
1200 New Jersey Avenue, SE – Room W45-306
Washington, D.C. 20590

Dear Mr. Harris:

This revised 573 letter for 11V-007 (GM 10426), is being submitted to update the information shown in sections 573.6(c)(2)(3)(4) and 573.6(c)(8) in the 573 letter dated January 25, 2011.

On April 14, 2011 GM became aware of a cross pin fracture on a rear axle option that was not included when this recall was initiated. Originally, it was believed that suspect pins were not built into this axle option based on GM's understanding of the material flow. With this latest finding GM has added 2,799 trucks to the recall which expands the vehicle involvement to include certain 2011 model year Cadillac Escalade, Escalade ESV, Escalade EXT; Chevrolet Avalanche, Colorado, Express, Silverado, Suburban, Tahoe; and GMC Canyon, Savana, Sierra, Yukon, Yukon and Yukon XL vehicles.

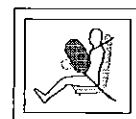

573.6(c)(2)(3)(4): This information is shown on the attached sheet.

573.6(c)(8): GM anticipates sending owner letters overnight by FedEx to the additional owners on April 22, 2011.

Sincerely,

M. Carmen Benavides
Director, Product Investigations
and Safety Regulations
