Dear Ms. DeMeter:

Winnebago Industries, Inc. submits the following report pursuant to Part 573 of the NHTSA regulations. The numbered paragraphs below correspond to those found at Part 573.5(c).

1. Winnebago Industries, Inc.  
605 W. Crystal Lake Road  
Forest City, IA 50436
2. The motor vehicles potentially containing the defect are 2012 model Winnebago ERA<sup>®</sup> motor homes built on 11,030-lb. GVWR chassis. These motor homes were manufactured November 11, 2010 through July 13, 2011. The vehicles were identified using production records showing models and VINs.
3. The total number of vehicles potentially containing the noncompliance is 51.
4. It is estimated that 100 percent of the vehicles contain the noncompliance.
5. Winnebago Industries, Inc. has determined a noncompliance exists. The affected vehicles were produced with a tire and loading information label and a weight of water caution label to comply with 49CFR 571.110. In previous model years, this labeling would be correct as the GVWR of this model was 8,850 lbs. However, starting in 2012 model year, this vehicle GVWR was increased above 10,000 lbs. and 49CFR 571.120 is now in affect versus 571.110, and the tire and loading label is replaced by the CCC version.
6. N/A.
7. Winnebago Industries, Inc. discovered this noncompliance as a result of our own internal monitoring.
8. Winnebago Industries, Inc. will remedy this noncompliance situation by mailing a new CCC label and instructions to the customer. Winnebago Industries<sup>®</sup> estimates the dealer letter will be mailed on or about August 19, 2011. The owner letter will be mailed two weeks later.
9. Enclosed is a copy of the dealer letter in draft form.
