DATE: January 06, 2011
TO: All Honda Sales, Service & Parts Managers
FROM: American Honda Parts and Service Divisions
RE: Recall/Stop Sale of 2010 L4 Accord/CR-V Engine Stalling

Note: A Stop Sale is being put in effect for a limited number of 2010 Accords and CR-Vs effective today, 1/06/2011. Should an unrepaired vehicle cause an injury or damage because of the recalled item, the dealership will be solely responsible to the damaged party, and will be required to defend and indemnify American Honda for any resulting claims.

Click on the links below to view the affected VIN list. Vehicles in the Certified Used Car program have been highlighted.

- [CR-V VIN List](#)

Basic Problem

The engine harness connector terminal that supplies power to all the ignition coils may have been damaged by the coupler checker at the factory. Any resulting poor contact could cause arcing, carbon deposit, and finally an intermittent circuit interruption for all ignition coils.

Service Information

A Service Bulletin will be posted 01/15/10. The repair will require a wire section at the terminal end of the wire harness to be replaced and the junction connector be replaced.

A customer notification will be mailed in late January or early February, 2011, depending on parts availability.

Parts Information

An initial allocation of repair kits will be allocated to dealers with Vehicles in the Certified Used Car program on 1/13/2011. You will be notified through an iN message when additional parts are available.
