**Subject: Molly Corporation / Carrier GenV EM-1 Evaporator Unit
NHTSA Recall # 11E-003**

Dear Valued Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

REASON FOR THIS RECALL

Molly Corporation has been made aware that a defect which relates to motor vehicle safety exists in certain vehicles it manufactured and equipped with Carrier GenV EM-1 Evaporator Units. This decision was based on information provided by Carrier that a possible safety defect exists in the Gen V EM-1 Evaporator Units equipped with an Allied Motion motor assembly containing a Delphi Pack-ConIII fuse holder shipped after January 1, 2006 for installation in commercial, school and shuttle buses. Molly Corporation installed these GenV EM-1 Evaporator Units in vehicles that it manufactured from 2006 through 2007.

The Problem:

Analysis of the potential safety issue determined that with time, temperature, and/or vibration, the fuse may loosen in the fuse holder resulting in high resistance and arcing. If sufficient arcing occurs, the fuse holder may melt, and may be accompanied by flame, smoke and potential fire propagation within the EM-1 Units.

Affected Vehicle Models:

Model
Molly Trolley

Model Years
2006 - 2007
