Subject: Carrier Gen V Em-1 Evaporator Unit
NHTSA Recall #11E-003

Dear Valued Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

REASON FOR THIS RECALL

Kingmor Supply, Inc. has decided that a defect which relates to motor vehicle safety exists in certain vehicles it equipped in the aftermarket with Carrier Gen V EM-1 Evaporator Units. This decision was based on information provided by Carrier Transicold that a possible safety defect exists in the Gen V EM-1 Evaporator units equipped with an Allied Motion motor assembly containing a Delphi Pack-ConIII fuse holder shipped after January 1, 2006 for installation in commercial, school and shuttle buses. Carrier Transicold installed these Gen V EM-1 Evaporator units in vehicles as aftermarket accessories from January 2006 and December 2010.

The Problem:

Analysis of the potential safety issue determined that with time, temperature, and/or vibration, the fuse may loosen in the fuse holder resulting in high resistance and arcing. If sufficient arcing occurs, the fuse holder may melt, and may be accompanied by flame, smoke and potential fire propagation within the EM-1 units.

Affected Models:

Model

Model Years
January 2006 - December 2010
