OWNER NOTIFICATION**NHTSA RECALL 11V-583**

Dear Nissan Juke Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Nissan has decided that a defect that relates to motor vehicle safety exists in some 2011 Model Year Nissan Juke vehicles. Our records indicate that you own or lease the Nissan vehicle identified by the VIN on the inside of this notice.

Reason for Recall

In some of the affected vehicles, the turbocharger air inlet tube and boost sensor assembly may separate, causing a malfunction. If this occurs, the vehicle will go into "fail-safe" mode and the check engine warning lamp will illuminate. If the vehicle continues to be driven in this condition without being promptly serviced, it could eventually stall while idling increasing the risk of a crash.

What Nissan Will Do

Your Nissan dealer will inspect, and if necessary, replace the air inlet tube. This service, free for parts and labor, should take less than an hour to complete, but your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.

What You Should Do

Contact your Nissan dealer at your earliest convenience in order to arrange an appointment to have your vehicle repaired. If the check engine warning lamp is illuminated, please contact your dealer immediately. Please bring this notice with you when you keep your service appointment. Instructions have been sent to your Nissan dealer.

If you have additional questions you may contact the National Consumer Affairs Department, Nissan North America, Inc., P.O. Box 685003, Franklin, TN 37068-5003.
