

Suspension Hitting LP Pipe

Description

HRV is issuing this documentation to resolve an issue that has arisen. There is a possibility that the suspension equalizer can hit the LP pipe mounted on the I-Beam of the frame. This document contains the information necessary to add a frame bumper to prevent the equalizer from traveling high enough to impact the LP pipe and to prevent damage.

VIN Range Effected

North Trail Travel Trailers within the VIN range of 5SFNB3425AE209605 to 5SFNB3620BE227945 with these specific floor plans: 26LRSS, 29BHSS, 29RBSS, 31BDSS, 31RESS, 31RKDS, 32BUDS, and 32QBSS.

Inspection & Repair

All units will need to have the (2) bumpers mounted directly to the bottom of the I-beam closest to the LP pipe. Warranty class code 99-01-07 will be utilized for this Recall and only one may be filed for the repair/inspection.

- 99-01-07 K – Inspection & Adding 2 bumpers = .50 Hours

Parts

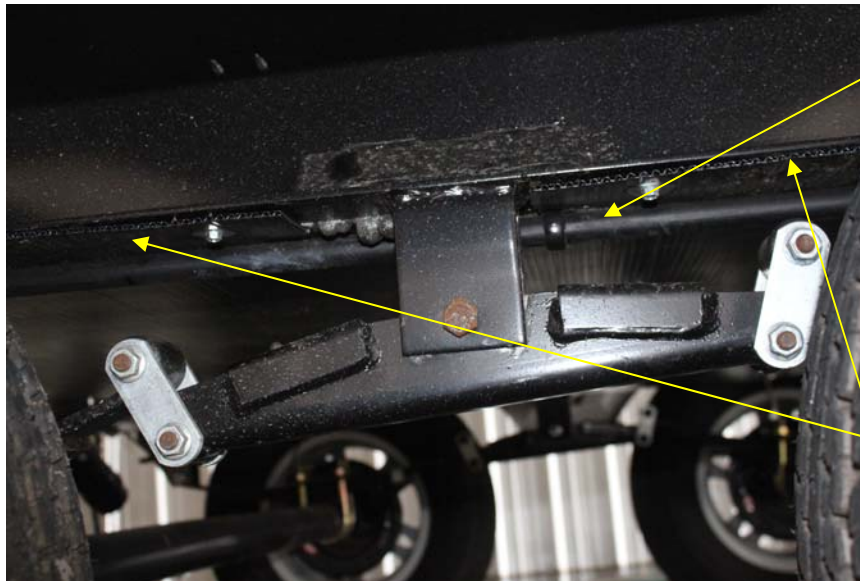

Recall kit part # 82902 which consists of 2 bumpers and 2 - 5/16"x18x1.25" washer head hex slot bolts.

Tools

90 degree Drill with 9/32" drill bit, ratchet with 1/2" socket and extension.

Please refer all questions and authorization requests to Heartland Dealer Services Department 877-262-8032

1. Verify the location on the frame to mount the bumper; this should be directly above the suspensions equalizer on the door side where the LP pipe runs along the frame. Note: bumpers are only mounted to one side of RV.

Location of LP pipe mounted on frame.

Location to mount the bumpers on frame.

2. Mark your location on frame and drill a 9/32" pilot hole in frame to mount bumper. Pilot hole should be as close to the center of I beam as possible. You may need to trim back the underbelly to get a good mount location.

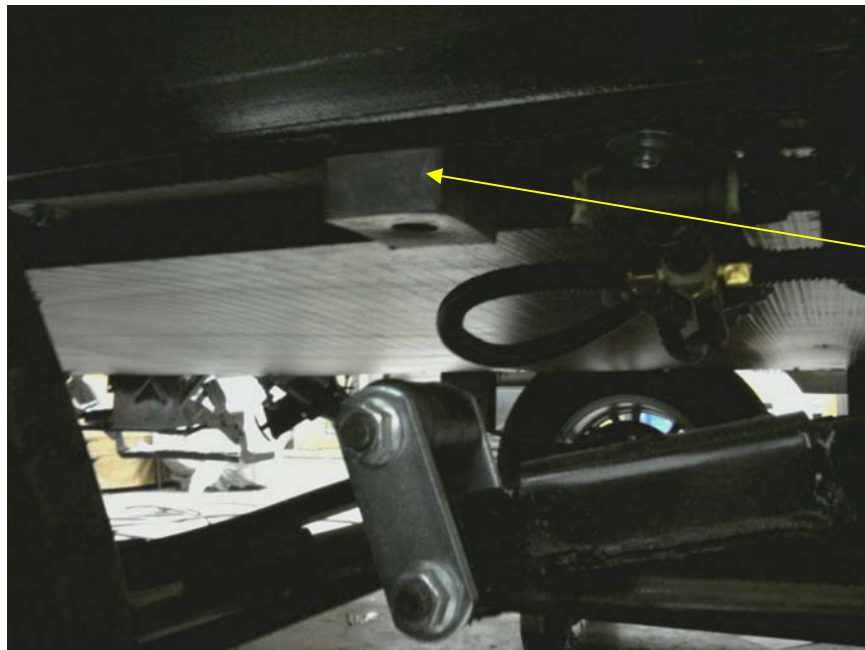

Drill pilot hole in frame.

- Using the provided bolts attach the bumper to the frame.

- Location of bumper after mounting.

- Repeat on the other side of equalizer. File claim
