

Mack Trucks, Inc.

Safety Recall ALERT

Date: January 24, 2012 **Number:** SRA-M12-01
To: All U.S. & Canadian Distributors
Attention: Service Manager, Warranty Manager, Parts Manager, Dealer Principal
From: Regulatory Affairs Department
Subject: Safety Recall, SC0361, FAW Front Axle Beam

Safety Recall Summary:

Due to manufacturing defects associated with recall SC0341 (reference NHTSA # 09V-240), over time the load and cycling of the load in certain applications may potentially result in fatigue cracks. Fatigue cracks can propagate and result in complete fracture of the axle beam. If complete fracture occurs, the driver may lose control of the vehicle, which can result in a vehicle crash.

Dealer's Responsibility:

The National Traffic and Motor Vehicle Safety Act and Canadian Motor Vehicle Safety Act require dealers to ensure that all new and used vehicles are free of safety defects and comply with all relevant safety standards at the time of delivery to the consumer.

Dealers should make their personnel aware of the safety recall. In the event that a dealer has a vehicle included in the safety recall in their inventory to be sold, the condition must be corrected before releasing it to a customer.

Release Schedule:

- Vehicle list is posted on the Trucks Dealer Portal.
- Owner Notices are scheduled to be mailed on or before February 15, 2012.
- Note to Dealer's: The initial inspection of the vehicle will be a mag-particle inspection performed by a third party vendor, so no repair instructions will be released at this time.

Questions:

Contact the Regulatory Affairs Department at vtna.regulatoryaffairs@volvo.com if you have questions.
