Urgent

Subject: Recall UPDATE #2-Battery Cable Insulated Connector  
for 2004-2010 BMW 5 Series, 6 Series

The previously announced Recall to inspect and correctly secure the insulated bulkhead connector of the positive battery cable in the vehicle's trunk was released on Monday, April 30, 2012.

SIB 61 14 12 (Recall Campaign 12V-126: Check the Battery Cable Connection) was published at that time with details on the repair procedure.

A quantity of 100 covers were shipped to each center during the week of April 30. Additional covers, 61 13 9 290 787, are available and open for ordering.

Additional stock of grease 83 19 2 295 229, which is also required for this repair, is available. You may order in multiples of six (i.e.; 6, 12, 18, etc.). This product will always ship in quantities of six. Each tube will repair 7 vehicles.

Affected vehicles can be identified with the Key Reader or in the DCSnet Warranty Vehicle Inquiry.

Customer letters were sent according to a staggered mailing, over 4 weeks, beginning the week of April 30, 2012.

Thank you for your cooperation,
