Subject: Recall Update -- Battery Cable Insulated Connector for
2004-2010 BMW 5 Series, 6 Series

The previously announced Recall to inspect and correctly secure the insulated bulkhead connector of the positive battery cable in the vehicle's trunk is planned to be released on April 30, 2012.

A Service Information bulletin will be published at that time with details on the repair procedure.

A quantity of 100 covers will arrive at each center during the week of April 30. Additional covers will be available for ordering once the S.I.B. is released.

Grease 83 19 2 295 229, which is also required for this repair, must be ordered by your dealer. Please ONLY order six tubes. Only six tubes will be shipped to each dealer regardless of order quantity. This product will always ship in quantities of six.

This initial supply of covers and grease should be used for critical cases.

Additional inventory of grease is in transit to the U.S. You will be advised of its arrival and the ability of ordering more.

Affected vehicles will be identified with the Key Reader or in the DCSnet Warranty Vehicle Inquiry on April 30, 2012.

Customer letters will be mailed according to a staggered mailing, over 4 weeks, beginning the week of April 30, 2012.

Thank you for your cooperation,

BMW of North America, LLC
