Subject: **Advance Notice of Recall**

Dear BMW Motorrad USA dealers,

BMW Motorrad USA will conduct a voluntary safety recall on Model Year 2007-2008 K 1200 (K 1200 S, R, R Sport) motorcycles. The issue pertains to the front brake system and is an amendment to recall 09V-202 first issued in 2009 on K 1300 S and K 1300 GT motorcycles.

Under very specific conditions (long rides at constant and high engine rpm, within a very narrow range and with the front brake fluid reservoir filled to maximum capacity), foaming of the brake fluid in the reservoir could occur resulting in a reduction of front brake performance. However, rear braking capability is fully retained and available to slow and stop the motorcycle. Approximately 1,365 K 1200 S, 200 K 1200 R, and 500 K 1200 R Sport models, produced between September 2006 and August 2008, are potentially affected.

All BMW Motorrad USA dealers will be informed of repair procedures as soon as possible. It is expected that customer notification letters will be mailed in November at which time repairs will begin.

Please see the attached document for more information and to help you answer any customer questions.

Regards,

BMW Motorrad USA
