

SAFETY RECALL M01 / NHTSA 12V-042 HEADLAMP & ABS/ESC WIRING

Dear: (Name)

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Chrysler has decided that a defect, which relates to motor vehicle safety, exists in some **2011 and 2012 model year Dodge Charger vehicles equipped with the Police Group package.**

The problem is... The headlamp wiring harness connectors on your vehicle (VIN: xxxxxxxxxxxxxxxxx) may overheat. This could cause a loss of low beam headlamp function without warning. A loss of headlights during nighttime driving could cause a crash without warning.

These vehicles may also experience a loss of Antilock Brake System (ABS) and/or Electronic Stability Control (ESC) as a result of an overheated Power Distribution Center (PDC) bus bar. A loss of ABS/ESC under certain driving conditions could cause a crash without warning.

What your dealer will do... Chrysler will repair your vehicle free of charge (parts and labor). To do this, your dealer will replace the headlamp wiring harness and inspect the ABS/ESC fuse type. Vehicles that do not pass the fuse inspection will have the fuse relocated and upgraded. The work will take about two hours to complete. However, additional time may be necessary depending on service schedules.

What you must do to ensure your safety... Simply contact your Chrysler, Jeep, or Dodge dealer right away to schedule a service appointment. Ask the dealer to hold the parts for your vehicle or to order them before your appointment. **Please bring this letter with you to your dealer.**

If you need help... If you have questions or concerns which your dealer is unable to resolve, please contact the Chrysler Group Recall Assistance Center at 1-800-853-1403.
