TO: «CUST»

SUBJECT: Recall Notice **12V-311 Detroit DD13 EPA07/ EPA10 High Pressure Fuel Line, Pump to Rail**  
Pierce job#: «Product\_\_Number»  
VIN: «VIN»

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Pierce Manufacturing has decided that a defect which relates to motor vehicle safety exists in certain Pierce Arrow XT, Contender Big Block, Dash CF, Quantum and Velocity custom fire apparatus models manufactured between August 28, 2010 and March 27, 2012, equipped with Detroit Diesel EPA07 and EPA10 DD13 engines and intended for use in emergency vehicles.

This decision was based on information provided to Pierce Manufacturing by Detroit Diesel Corporation.

The pump to rail High Pressure Fuel Line (HPFL) support system on certain EPA07 and EPA10 DD13 engines is sensitive to assembly torque and may be damaged during rework. Incorrect torque applied to the dampener p\_clip fasteners may damage the fasteners allowing the p-clips to become loose potentially leading to fuel line cracking and a fuel leak. A substantial diesel fuel leak may create a road hazard increasing the risk of motor vehicle crash.
