

IMPORTANT SAFETY RECALL NOTICE

Dear Mr. :

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Lippert Components, Inc. d/b/a Extreme Trailers (“Extreme”) has decided that a safety defect exists in certain boat trailers that have incorporated certain wheel assemblies supplied by Carlisle Transportation Products.

! I M P O R T A N T !

THE WHEEL ASSEMBLIES OF YOUR BOAT TRAILER ARE BEING RECALLED.

Do **not** drive your boat trailer until you have had the wheel assemblies inspected, repaired and/or replaced. You should **immediately** contact the Customer Care Department at Carlisle Transportation Products between 9am and 5pm Pacific time, Monday through Friday at (909) 923-2710 to arrange for the replacement of the affected wheel(s). Carlisle Transportation Products will repair or replace affected wheel(s) free of charge including dismounting and mounting. If you have previously paid for replacement wheel(s) as a result of the defect, Carlisle Transportation Products will reimburse you the cost of such replacement based on your receipts.

These wheels were manufactured with machined dimensions for the application of a center cap and the application of steel lug inserts that were not controlled to the required blue print specifications. As a result, the wheels are subject to not being tightened to proper torque requirements during the mounting process. Consequently, when the trailer mounted product encounters continued road use it is possible that the lugs can come unseated which could lead to the wheel separating from the trailer increasing the risk of trailer damage and a vehicle crash.

The affected Extreme boat trailers were manufactured by Extreme between February 2011 and February 2012 and have incorporated one of the following described wheel assemblies:

| Generic Name | Brand Name | Part Numbers | |
|---|--|---------------------|-------------|
| Carlisle Toy Hauler Series Trailer Wheel | “Black Rock” INTRUDER Series Trailer Wheels | 910B561235 | 910B566035 |

Federal law requires any lessor who receives a notification of a determination of a safety-related defect or noncompliance pertaining to any leased motor vehicle shall send the notice to the lessee within ten (10) days.
