Subject: Parts Kit for Recall 12V-177

To: All BMW Motorrad Dealer Parts Managers

BMW Motorrad USA has assembled 920 parts kits, P/N 11 24 2 333 689 to support the K46 engine recall. This amount of kits represents over 77% of all motorcycles involved. Along with the individual parts delivered during the first days of the recall release there are sufficient parts already in dealer inventories to complete nearly all motorcycles affected.

The action to assemble kits was intended to be limited so when final stocks of the kit are depleted please order parts individually as described in page 3 of service bulletin 11 002 12 (008)R.

Best regards,

Mike Hernandez

Parts and Accessories Manager
