Service Bulletin

Service Bulletin #TS-0027: Actuator Brake Pressure

Condition: Actuator disengagement may not fully release brakes

Models Affected: 2012 Nitro Z7, Z7 Sport, Z8, Z9, 290 Sport
2012 Tahoe Q4, Q5, Q7, Q8, 195, 215, 22
2013 Tahoe Q4, Q5, Q7, 195, 215

Trailers manufactured between September 28, 2011 and May 13, 2012 equipped with affected actuator model.

Labor Code & Time: B77 .25 HR INSPECT ONLY
B78 .75 HR INSPECT AND REPLACE

Bulletin Information

DESCRIPTION OF CONCERN:

It has been determined that brake actuators in a specific date code range may maintain pressure on the brake system of the trailer causing the trailer brakes to remain partially engaged preventing proper operation of the brake system which may cause damage to the brake components.

We have sent this notification in the interest of consumer safety and continued satisfaction with our products and in accordance with Title 46 United States Code Chapter 43, Sec 4310.

VERIFICATION PROCESS:

Verify actuator date code.

CORRECTIVE ACTION:

Corrective action, if required, for this condition is replacement of the affected actuator. Replacement actuators are provided free of charge directly from the manufacturer, Tie Down Engineering, by calling 800-241-1806.

To order replacement actuators, contact Denise Barber.

Email Denise.Barber@tiedown.com

For technical questions, contact Roy Segovia.

Email Roy.Segovia@tiedown.com

Replaced units will be returned with a call tag as provided by Tie Down Engineering.

You may also contact Tracker Marine Group Warranty Department at 866-378-2529.

**PLEASE READ THE ENTIRE INSTRUCTION SET BEFORE
PROCEEDING WITH ANY CORRECTIVE ACTION**

Verify the date code on the actuator as per the instructions provided in the bulletin prior to securing the trailer on a jackstand.

Begin this process only after the following safety precautions have been followed.

- **It is recommended to have the trailer on a smooth and level concrete or asphalt surface to perform the corrections.**
- **Jack up one side of the trailer using a jack of adequate capacity to lift the package. Chock the opposite wheel fore and aft.**
- **Secure the trailer on a jackstand of adequate capacity to support the package.**
- **When jacking and using jackstands, place them so as to clear wiring, brake lines, and suspension parts.**

The following pages contain the affected serial number list by dealer number. Retailed units will display the owner's name based on our warranty registration records.

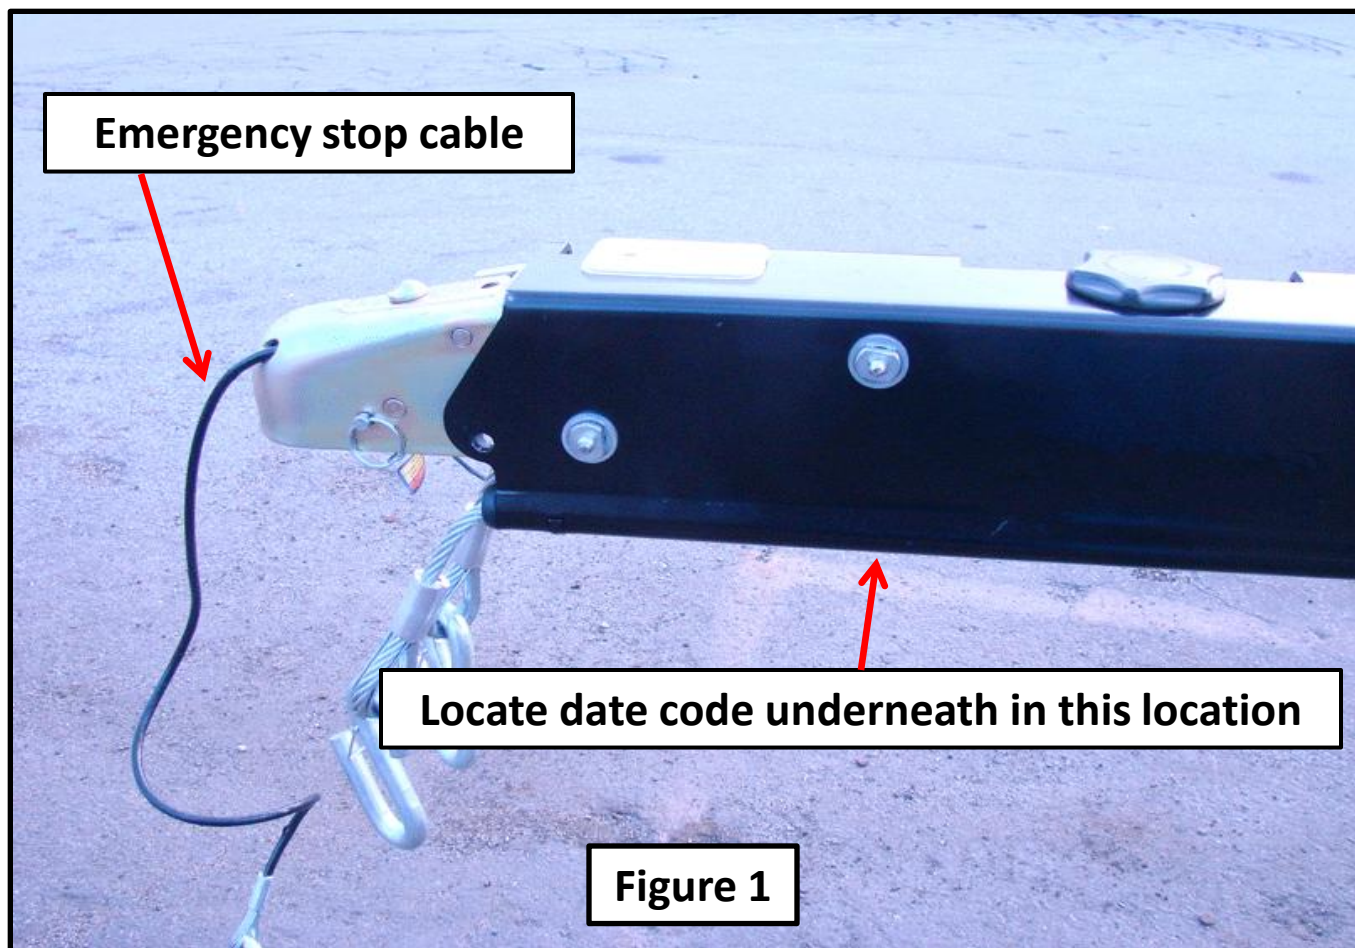

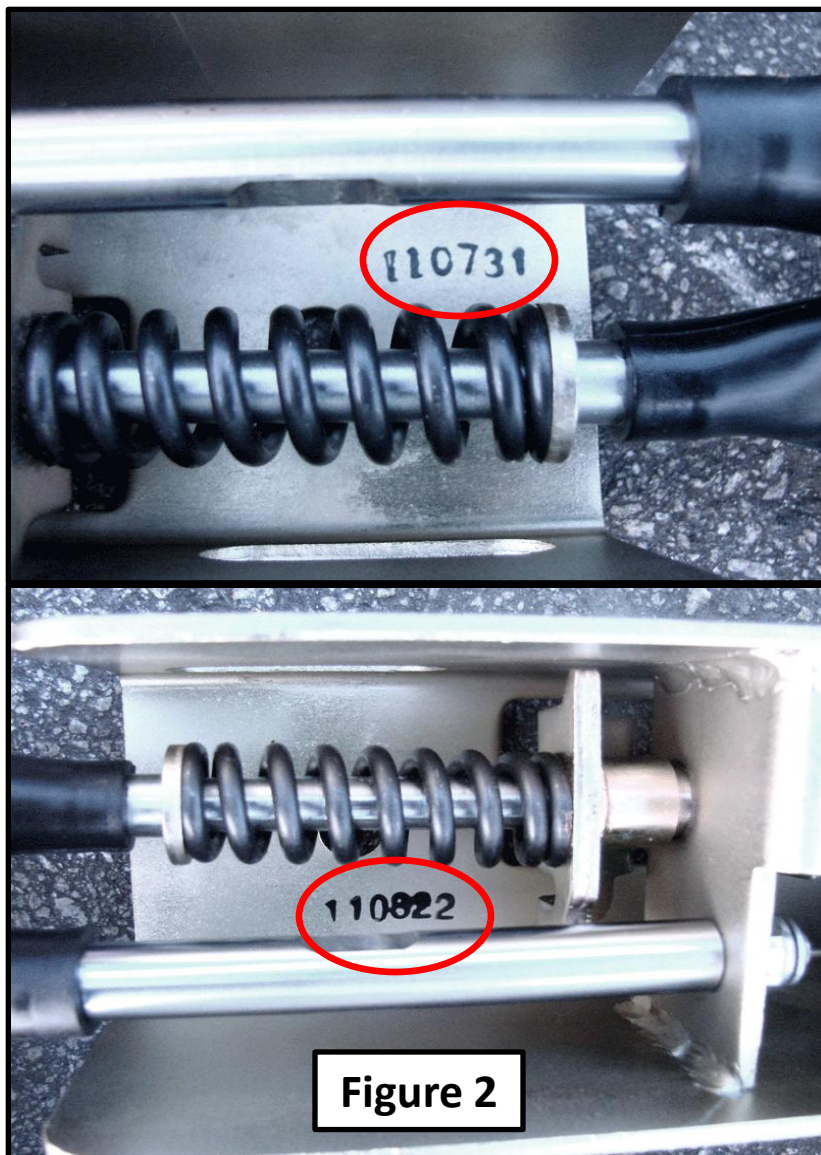

Figure 1 displays the Tie Down Engineering actuator #48867K installed in the trailer tongue. This unit is Tracker Marine Group part #161986.

Affected actuators are identified by the date code stamped underneath the actuator in the location shown.

The date code on the affected units are #110731 and #110822. If the date code cannot be identified, or is not legible, the test process must be performed.

VERIFY THE EMERGENCY STOP CABLE HAS NOT BEEN ENGAGED.

Inspect for date code on underside of actuator. Figure 2 displays examples of the affected date codes.

If date code is visible and the code is not either 110731 or 110822, no further action is required.

If date code is visible and is either 110731 or 110822, proceed to the next step.

If no date code is visible, then proceed to the next step.

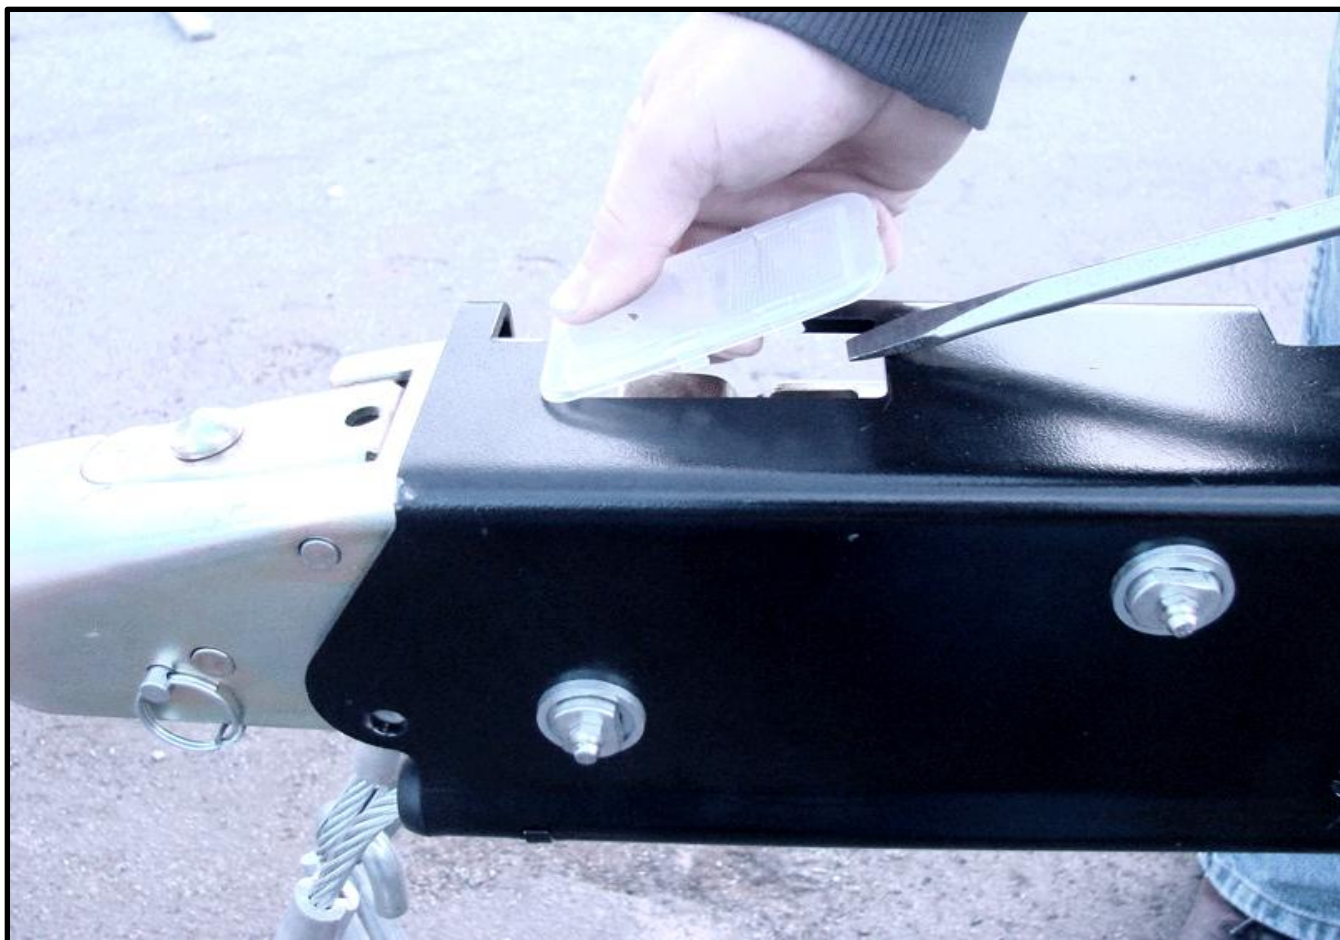

Figure 3

If the actuator is in the affected date range, jack up the trailer as per the safety precaution instructions for supporting the trailer and begin the test process.

Remove the plastic cover on the top of the actuator as shown in Figure 3 to gain access to the internal mechanism.

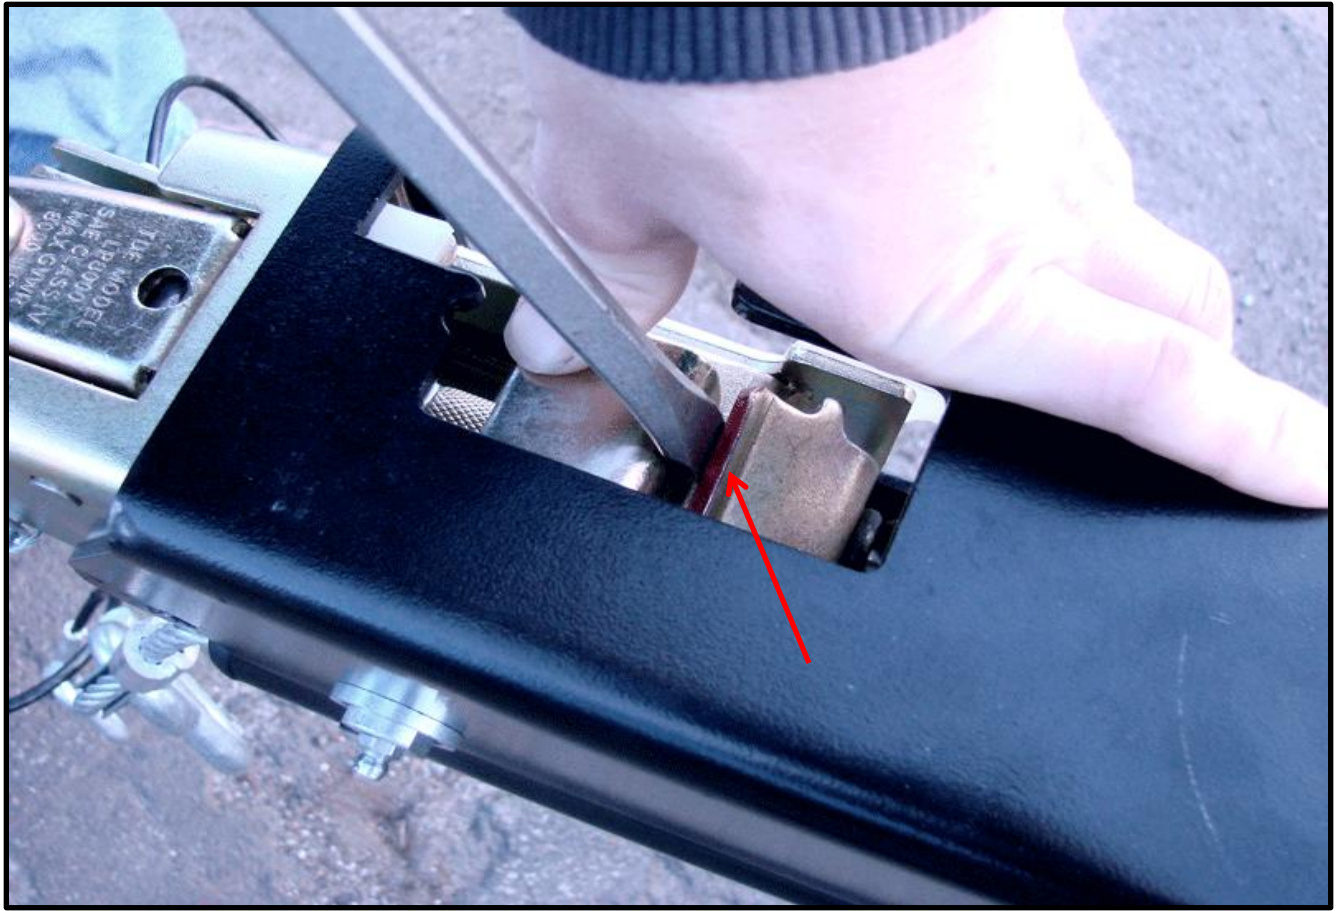

Figure 4

Figure 4 shows the inner mechanism you will use to pump pressure into the brake system. Note the aft plate has red marking on the edge. This plate will be used to pump up the system.

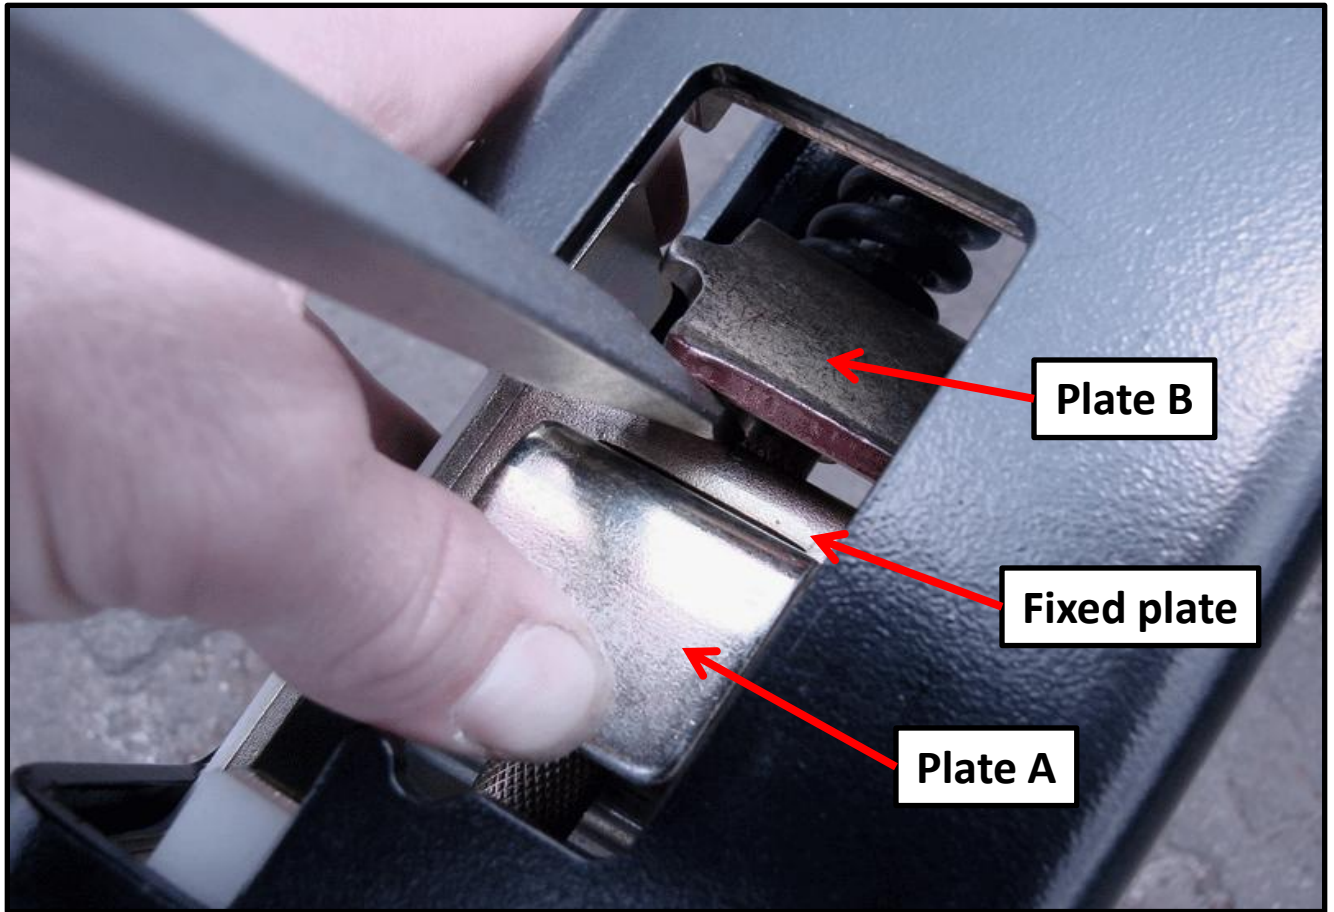

Figure 5

Using a large screwdriver as a lever, insert between Plate B and the fixed plate, depressing Plate A with your thumb as shown in Figure 5.

Depressing Plate A releases the master cylinder rod allowing Plate B to be used to pump up the brake system using the fixed plate as a leverage point.

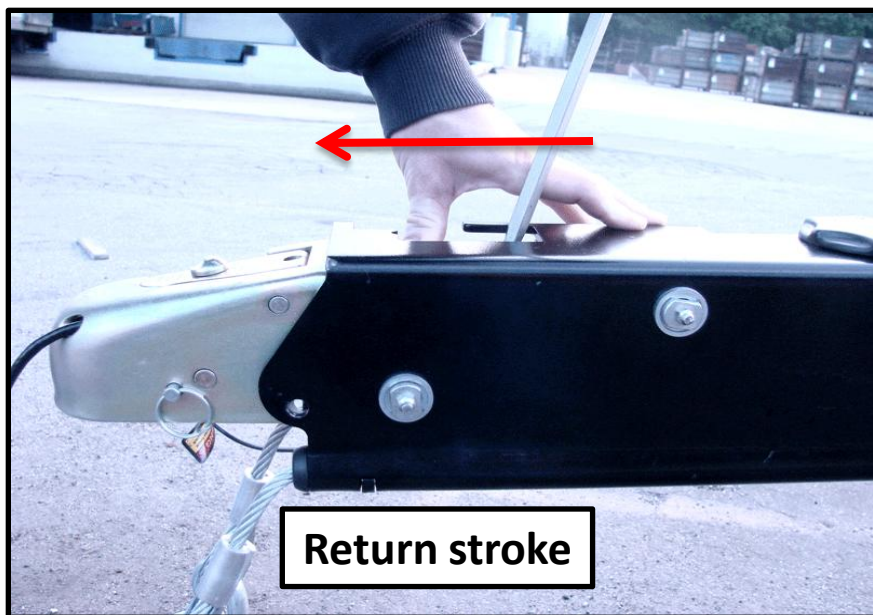

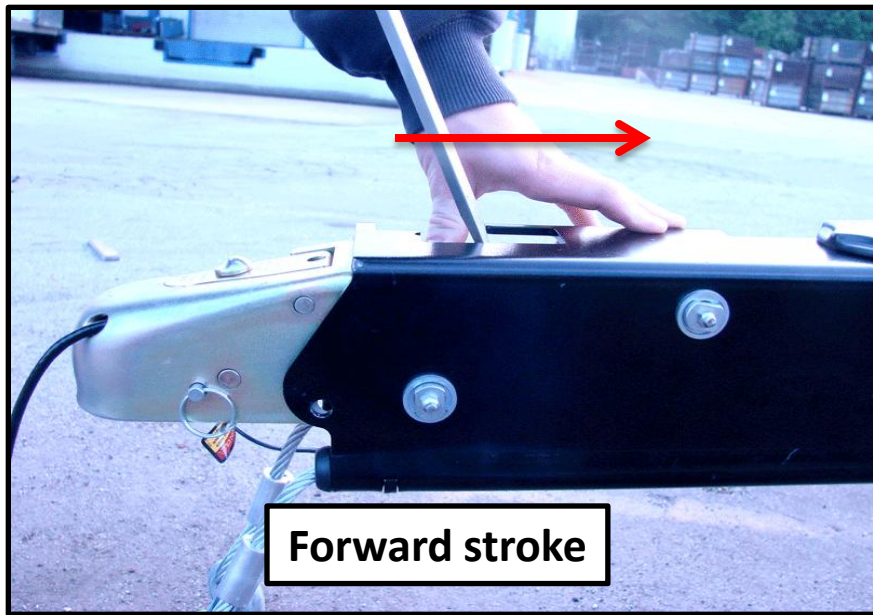

Figure 6

Pressurize the brake system by pumping the master cylinder 25 strokes as shown in Figure 6. You will feel some resistance on the forward stroke. There will be no resistance on the return stroke.

After pressurizing the system, manually rotate tire/wheel supported by the jackstand. If the tire/wheel is unable to be rotated manually, replace the actuator.

Click here for *ACTUATOR REPLACEMENT INSTRUCTIONS*.

Replacement actuators are provided by Tie Down Engineering free of charge by calling 800-241-1806.

For parts, contact Denise Barber. Email Denise.Barber@tiedown.com

For technical questions, contact Roy Segovia. Email Roy.Segovia@tiedown.com

A call tag will be issued to return replaced units directly to Tie Down Engineering. Submit a warranty claim to Tracker Marine Group for labor only using Labor Operation B77 for actuator inspection and replacement. You must reference your Tracker Marine Group warranty claim number on actuators returned to Tie Down.
