

SAFETY RECALL ACTION		
To:	Applicable North American Dealers (refer to Appendix "A")	Reference RA-19-0015V2 Issued: 11 October 2012 Page 1 of 37
For the attention of:	Service Manager/After Sales Manager	
Please copy to:	The Dealer Principal The Sales Manager The Warranty Administrator Aston Martin Technician(s) The Parts Manager	
Model:	V12 Vantage	
VIN Range:	Refer to Appendix "A"	
Subject:	Incorrect Software Configuration File for the TPMS on V12 Vantage - North America Only	

Reason for Version 2 of this Recall Action (RA-19-0015V2)

Version 2 of this Recall Action has been issued to remove some vehicles from the applicable VIN list. We have found that some of these vehicles do not have TPMS installed. Others in the list are included in Quarantine Notice QN-19-0011 and are not registered at this time. The vehicles that have been removed are in **RED** strike-through text in Appendix "A". Amendments to the text of this document have a black line against them in the left-side margin. Please destroy all copies of RA-19-0015 that you have and replace them with this Recall Action RA-19-0015V2.

Attached Documents:

1. **Appendix "A" – List of applicable VINs**
2. **Copy of the Customer letter**
3. **Copy of the change of owner or address form.**

Reason for this Safety Recall Action (RA-19-0015V2)

Aston Martin has determined that a defect which relates to motor vehicle safety exists in V12 Vantage vehicles manufactured between April 2009 and September 2012. These vehicles have the incorrect software installed in the Tyre Pressure Monitoring System (TPMS). This means that if the pressures in the front tyres of the vehicle reduce because of a leak or puncture, the TPMS system will not give a warning to the driver until the tyre pressure is 3 psi lower than the design specification. This problem means that the vehicle is non-compliant with the FMVSS138 specification that states a vehicle TPMS system must give the driver warning when a tyre pressure reduces by 25% or more of its specified operating pressure.

Note: *The warning light in the Drivers Information Module (DIM) will still come on, but at a lower pressure than the design specification.*

This problem only affects the front tyres. The TPMS for the rear tyres will operate correctly.

To correct this problem, you must upgrade the software for the TPMS on all vehicles in the attached VIN list in Appendix "A". Refer to the Workshop Procedure that follows to update the software on the affected vehicles.

PLEASE DO A CHECK OF ALL VEHICLES THAT ARE IN THE AFFECTED VIN LIST.

Legal Requirements

The National Traffic and Motor Vehicle Safety Act, as amended, provides that each vehicle which is subject to a recall campaign of this type must be adequately repaired within a reasonable time after the owner has tendered it

for repair. Failure to repair within sixty (60) days after tender of a vehicle is prima facie evidence of failure to repair within a reasonable time.

If the condition is not adequately repaired within a reasonable time, the owner may be entitled to an identical or reasonable equivalent vehicle at no charge, or to a refund of the purchase price less a reasonable allowance for depreciation.

To avoid having to provide these burdensome solutions, every effort must be made to promptly schedule an appointment with each owner and to repair their vehicle as soon as possible. As you will see in reading the attached copy of the letter that is being sent to owners, the owners are being instructed to contact Aston Martin Customer Service if their dealer does not remedy the condition within three (3) days of the mutually agreed upon service date. If the condition is not remedied within a reasonable time, they are instructed on how to contact the National Highway Traffic Safety Administration.

IMPORTANT: Some of the involved vehicles may still be in your Dealer inventory. Federal law requires you to complete the recall service on these vehicles before retail delivery.

Communications

Because of the quantity of vehicles that are affected by this problem, please write to every owner directly to tell them about this Recall Action. A copy of the letter is attached at the end of this document for you to copy. There is also a copy of the Customer "Change of Address or Ownership" form. Please include a copy of this with each Customer letter. To claim for your administration and stationary and administration costs, refer to "Warranty Data" at the end of this procedure.

Service Reception Desk – Checks you must do before you book the vehicle in.

Before you start work, log on to the Online Dealer Warranty (ODW) system. Do the steps that follow:

1. Select the Warranty Live screen (Outstanding Campaigns Status).
2. Use the VIN list in Appendix "A" to do a check of the VINs in your control.
3. Find out if there are other open Service Actions (SAs) or Recall Actions (RAs) for the vehicles in the list.
4. List the SAs and RAs and plan the work so that the Customer only needs to come to your Dealership once.

Note: *The ODW system operates in real-time. Thus, the online condition shows only the newest Dealer Warranty Claim submissions.*

This Recall Action Includes the Sections That Follow:

- Workshop Procedure
- Appendix 'A' – List of applicable VINs
- An example of the Customer letter
- An example of the Customer's change of owner or address form.

Workshop Procedure

Note: *You will need the Tyre Pressure Monitor System Diagnostic Interface (TPMSDI) to do this procedure. If you do not have this unit, Parts Operations will send the TPMSDI to you. You do not need to order it. The new part number for this unit is 4G43-43-11288 but if you have the unit with part number 4G43-43-112113, you can use it to do this procedure.*

WARNING: THE ALARM FUNCTIONS FOR THE TYRE PRESSURE MONITORING SYSTEM DO NOT OPERATE WHEN THE TPMSDI IS CONNECTED TO THE VEHICLE. YOU WILL NOT HEAR OR SEE WARNINGS FROM THE SYSTEM IF AN ALERT OCCURS WITH ONE OR MORE OF THE WHEELS WHILE THE VEHICLE IS IN MOVEMENT OR STOPPED.

Connect the TPMSDI to the Vehicle

1. Make sure that the ignition is set to off.
2. Remove the front bezel (1) from the Smartire ECU (refer to Figure 1). To do this, carefully push in the two ends of the bezel (2) and pull it forwards.
3. Install the Smartire ECU key (3). You can only install the key with the tab (4) at the top.

Figure 1

CAUTION: DO NOT LET THE TIP OF THE TPMSDI-TO-SMARTIRE COMMUNICATION CABLE TOUCH THE TPMS ECU POWER SOCKET IN THE STEP THAT FOLLOWS. IF YOU DO, THE TPMSDI UNIT WILL BE PERMANENTLY DAMAGED.

4. Connect the TPMSDI-to-Smartire communication cable (3) into the socket on the back of the TPMS ECU (1) and the TPMSDI (4) (refer to Figure 2). Do not disconnect the TPMS ECU connection to the vehicle (2).
5. Connect the power cable (5) to the TPMSDI (4).
6. Connect the cigar lighter adaptor of the power cable to the vehicle's auxiliary power socket.

Figure 2

7. Connect the male connector (2) of the RS232 serial connection cable to the serial connector on the TPMSDI (1) (refer to Figure 3).

8. Connect the female connector (3) of the RS232 serial connection cable to the serial connector on the AMDS laptop (4).

Figure 3

Update the TPMS Configuration

9. Make sure that your AMDS software is at Version 2.29 or higher.
10. Start the AMDS in the usual way.
11. Click on the "Special Apps" button in the top tool bar (1), and then click on the "TPMS Utilities" button (2). The AMDS will check if the new Beru TPMS system is installed on the vehicle. Because the vehicle has the Smartire system installed, the AMDS will start the software that connects with the TPMSDI (refer to Figure 4).

Figure 4

12. When the software has loaded, you will see a "Connect" button and an "Exit" button. Click on the "Connect" button (refer to Figure 5).

Figure 5

13. Obey the instruction to set the ignition to on at position 2 (refer to Figure 6).

Figure 6

14. The AMDS will firstly connect with the TPMSDI and make sure that it has the latest firmware (the software that the unit runs internally). If the firmware is out of date, you will see a message to tell you not to set the ignition to off, or disconnect the unit. If you see this message, click on the "OK" button and let the AMDS re-flash the TPMSDI.
15. When the AMDS has connected to TPMSDI, it will try to communicate with the TPMS ECU. If this is completed correctly, the message in Figure 7 will be shown on the AMDS.
If the connection fails, set the ignition to off then do the procedure from Step 12 again.

Figure 7

16. Click on the "OK" button (refer to Figure 8).

Figure 8

17. If the vehicle is a V12 Vantage, the "Check Config" button will show (refer to Figure 9). Click on the button.

Figure 9

18. The system will do a check of the installed configuration. If a configuration update is necessary, the TPMS will automatically update the software. When this process is complete, the message "The module software has been updated successfully" will show (refer to Figure 10)

Figure 10

19. Click the "OK" button (refer to Figure 11).

Figure 11

20. If an update is not necessary, you will see the message "The module software version is correct" (refer to Figure 12).

Figure 12

21. Click the "OK" button (refer to Figure 13).

Figure 13

22. Click on the "Exit" button (refer to Figure 14).

Figure 14

Disconnect the AMDSOI

23. Set the ignition to off

24. Disconnect the female connector (3) of the RS232 serial connection cable from the serial connector on the AMDS laptop (4) (refer to Figure 15).
25. Disconnect the male connector (2) of the RS232 serial connection cable from the serial connector on the TPMSDI (1).

Figure 15

26. Disconnect the cigar lighter adaptor of the power cable (5) from the vehicle's auxiliary power socket (refer to Figure 16).
27. Disconnect the power cable (5) from the TPMSDI (4).
28. Disconnect the TPMSDI-to-Smartire communication cable (3) from the socket on the back of the TPMS ECU (1) and the TPMSDI (4). Do not disconnect the TPMS ECU connection to the vehicle (2).

Figure 16

29. Push the locking tab (4) of the Smartire ECU key (3) down to release the key. Remove the Smartire ECU key (3) (refer to Figure 17).
30. Install the front bezel (1) onto the Smartire ECU.

Figure 17

Warranty Data

Description	Labour Time
Update the software for the SmarTire TPMS module.	0.3 hours

Description	Warranty Category	Sundry Code	Quantity
Administration and Stationary Costs	Consumables	ZZZ001	1

When you make the claim for the Administration cost, enter the data as shown in "SUNDRY COSTS" (refer to below:

Note: *You can claim 3.00 GBP or the value in your Parts Account Currency equivalent.*

IMPORTANT SAFETY RECALL NOTICE

Dear (Customer)

Safety Recall Action (RA-19-0015) – Incorrect Software Configuration File for the TPMS on Aston Martin V12 Vantage

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

REASON FOR THIS RECALL

Aston Martin has found that a defect that fails to conform to Federal Motor Vehicle Safety Standard FMVSS138 exists in V12 Vantage vehicles built between 2009 and 2012. These vehicles have the incorrect software installed in the Tire Pressure Monitoring System (TPMS). This means that if the pressures in the front tires of the vehicle reduce because of a leak or puncture, the TPMS system will not give a warning to the driver until the tire pressure is 3 psi lower than the design specification. This problem means that the vehicle is non-compliant with the FMVSS138 specification that states a vehicle TPMS system must give the driver warning when a tire pressure reduces by 25% or more of its specified operating pressure.

Note: *The warning light in the Drivers Information Module (DIM) will still come on, but at a lower pressure than the design specification.*

This problem only affects the front tires. The TPMS for the rear tires will operate correctly.

WHAT WE WILL DO

The software that operates the tire pressure monitoring system in the vehicle will be updated to the correct specification free of charge.

WHAT YOU SHOULD DO

Please contact your Aston Martin Dealer as soon as possible to arrange a date for the repair. Instructions for making this correction have been sent to your Dealer and the necessary software and equipment is available. The labor time necessary to complete this service correction is approximately 15 minutes. Please ask your Dealer if you wish to know how much additional time will be needed to schedule and process your vehicle.

Your Aston Martin Dealer is best equipped to obtain parts and provide service to ensure that your vehicle is corrected as promptly as possible. If, however, you take your vehicle to your Dealer on the agreed service date, and they do not remedy this condition on that date or within three days, we recommend you contact Aston Martin Customer Service by calling 1-888-923-9988.

After contacting your Dealer and Aston Martin Customer Services, if you are still not able to have the safety defect remedied without charge and within a reasonable time, you may wish to write to the Administer, National Highway Traffic Safety Administration, 1200 New Jersey Avenue, SE, Washington, DC 20590 or call 1-888-327-4236 (TTY: 1-800-424-9153) or go to <http://www.safercar.gov.com>.

If you have had your vehicle repaired due to this problem before receipt of this notice, you may be entitled to reimbursement for any out of pocket costs. For further information, please contact Aston Martin Customer Service by calling 1-888-923-9988.

IF YOU NO LONGER OWN THE VEHICLE

If you have sold or traded your vehicle, please let us know by completing the enclosed Change of Owner form and returning it to us.

Federal regulations require that any lessor receiving this recall notice must forward a copy of this notice to the lessee within ten days.

We are sorry to cause this inconvenience. However, we have taken this action in the interest of your safety and continued satisfaction with our products.

Yours faithfully

A handwritten signature in blue ink, appearing to read 'CEBaker', with a long horizontal flourish extending to the right.

Chris E Baker
General Manager, After Sales Operations, Aston Martin Lagonda Limited.

Subject: Incorrect Software Configuration File for the TPMS on V12 Vantage

Vehicle Identification Number (VIN)

Registration Number

(Where Known)

I do not own/operate this vehicle now. The vehicle has been:

- Stolen
- Scrapped
- Sold/transferred to a new owner
- Part exchanged at an Aston Martin dealer
- Part exchanged at a non-Aston Martin Dealer
- Declared an insurance write-off
- Permanently exported to another country
- Returned to the lease company
- Sold at Auction
- The address you have used is incorrect
