This notice applies to your vehicle, 4S2CM57

Dear Isuzu Customer:

This notice applies to your vehicle, 2004 model year Isuzu Amigo/Rodeo Sport VIN 4S2CM57 accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Isuzu Motors Limited has decided that a defect which relates to motor vehicle safety exists in certain model year (MY) 1998-2002 Amigo and Rodeo Sport vehicles originally or currently registered in the following states (the "Salt Belt"): Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, the District of Columbia, West Virginia, Ohio, Indiana, Kentucky, Michigan, Illinois, Wisconsin, Minnesota, Iowa, and Missouri.

WHAT IS THE CONDITION?

Certain Isuzu vehicles that have experienced sustained exposure to highly corrosive materials used in some jurisdictions for road deicing purposes may experience excessive corrosion in the vicinity of the forward mounting point bracket for the left or right rear suspension lower link prior to the time that such corrosion would normally be expected. In certain extreme cases, excessive corrosion in this vicinity may result in a lower link bracket becoming detached from the frame, which can affect vehicle handling and potentially cause a crash.

WHAT WE WILL DO

An Isuzu service facility will inspect the left and right forward mounting point bracket areas of the rear suspension lower link of your vehicle to determine if corrosion is present in those areas. For vehicles in which little or no corrosion is observed in those areas, the service facility will treat the areas with an anti-corrosion compound to reduce the likelihood of additional corrosion in those areas in the future. In the case in which corrosion has damaged the area around either or both of the forward mounting point brackets of the rear suspension lower link and affected their connection to the vehicle's frame, one of two different types of reinforcement brackets will be installed, depending upon the extent of the corrosion. In the event that the reinforcement bracket remedy would not be effective, Isuzu will provide an alternative remedy. This service will be performed for you at no charge.

You or a prior owner of your vehicle may have mistakenly received a recall notice stating that your vehicle had been included within a group of older vehicles for which you were offered a free remedy if you or the prior owner responded to the recall notice within a year. After that time, the letter stated that you would be responsible for the cost of the remedy. Your vehicle was inadvertently included in that group. The recall notice for your vehicle should have stated that your vehicle would be remedied at no charge without a time limitation. Your vehicle is entitled to a free remedy. If you have not already had this recall repair conducted on your vehicle, or if you have paid to have the recall remedy conducted on your vehicle, please follow the instructions in the "WHAT SHOULD YOU DO" or "REIMBURSEMENT" section of this Recall Notice.

For the majority of vehicles, the inspection and the application of the anti-corrosion compound will be all that is necessary, and that work will take approximately ninety minutes. If, however, the corrosion in the area(s) specified above is so extensive that it is necessary to install new reinforcement brackets, the repairs will take approximately three hours or ten hours, depending on which type of bracket is used. Of course, depending upon the service facility's work schedule and/or the need to have the necessary parts delivered to the service facility, it may be necessary for you to make your vehicle available for a longer period of time.

tear off at both perforations, and drop it in the mail. Postage has already been paid. We will contact the new owner.
