Orlando, FL 32822

NVS-215KS
13V-135

Subject: Incorrect Gauges and ABS Light/FMVSS 121

Dear Cem Yazmanoglu:

This letter serves to acknowledge Temsa Global Sanayi Ve Ticaret A.S.'s notification to the National Highway Traffic Safety Administration (NHTSA) of a safety recall which will be conducted pursuant to Federal law for the product(s) listed below. Please review the following information to ensure that it conforms to your records as this information is being made available to the public. If the information does not agree with your records, please contact us immediately to discuss your concerns.

Makes/Models/Model Years:

TEMSA/TS30/2012-2013
TEMSA/TS35C/2011-2013

Mfr's Report Date: April 9, 2013

NHTSA Campaign Number: 13V-135

Components:

ELECTRICAL SYSTEM: INSTRUMENT PANEL

Potential Number of Units Affected: 228

Problem Description:

Tems Global is recalling certain model year 2011-2013 TS35C and 2012-2013 TS30 motor coach buses. First, the two service air brake pressure gauges are both reading the pressure of the same air tank. Second, the ABS system malfunction indicator light does not illuminate momentarily when the key is turned to the 'ON' or 'RUN' position. Thus, these vehicles fail to comply with Federal Motor Vehicle Safety Standard No. 121, "Air Brake Systems."

Consequence:

Without accurate gauges, the driver may not notice the pressure change in the secondary brake system. The driver may also not be aware of an ABS issue without the bulb illuminating each time the key is turned on. Either issue increases the risk of a crash.

Remedy:

Tems Global will notify owners and they will update the software, free of charge. The manufacturer has not yet provided a notification schedule. Owners may contact Temsa Global at 1-404-602-0151.

Notes:

Owners may also contact the National Highway Traffic Safety Administration Vehicle Safety Hotline at 1-888-327-4236 (TTY 1-800-424-9153), or go to www.safercar.gov.

Under 49 U.S.C. § 30112(a), it is illegal for anyone, including a manufacturer, distributor, dealer, or retailer to sell an item of equipment or vehicle that fails to comply with all applicable Federal motor vehicle safety standards.

Please be reminded of the following requirements:

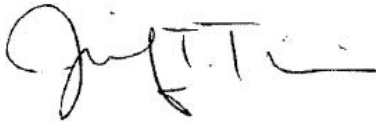

You are required to provide an estimated date including month, day, and year, when you will send notifications to owners, dealers, and distributors as soon as it becomes available. Please be reminded that it is expected owners will be notified of a safety defect in their vehicles within 60 days of a manufacturer's notification to NHTSA of a safety defect in those vehicles. You are required to submit a draft owner notification letter to this office no less than five days prior to mailing it to the customers.

Copies of all notices, bulletins, dealer notifications, and other communications that relate to this recall, including a copy of the final owner notification letter and any subsequent owner follow-up notification letter(s), are required to be submitted to this office no later than 5 days after they are originally sent (if they are sent to more than one manufacturer, distributor, dealer, or purchaser/owner).

As stated in Part 573.7, submission of the first of six consecutive quarterly status reports is required within one month after the close of the calendar quarter in which notification to purchasers occurs. Therefore, the first quarterly report will be due on, or before, 30 days after the close of the calendar quarter.

Your contact for this recall will be Kelly Schuler who may be reached by phone at (202) 366-5227, or by email at kelly.schuler@dot.gov or through the office email at rmd.odi@dot.gov. We look forward to working with you.

Sincerely,

Jennifer Timian
