Mfr's Report Date: August 9, 2013

NHTSA Campaign Number: 13V-366

Components:
POWER TRAIN:DRIVELINE:DRIVESHAFT

Potential Number of Units Affected: 381

Problem Description:

Volvo Trucks North America is recalling certain model year 2013-2014 VNL vehicles manufactured April 2, 2012, through May 3, 2013; and equipped with a Meritor RPL-20 driveline transmission. The driveshaft is too weak for this application and may fail.

Failure of the driveshaft can result in debris on the roadway and disabling of the truck, which can increase the risk of a crash.

Remedy:

Volvo will notify owners, and dealers will replace the driveshaft, free of charge. The recall is expected to begin by October 9, 2013. Owners may contact Volvo at 1-336-393-2000. Volvo's recall number is RVXX1305.

Notes:

Owners may also contact the National Highway Traffic Safety Administration Vehicle Safety Hotline at 1-888-327-4236 (TTY 1-800-424-9153), or go to www.safercar.gov.

Also, copies of all notices, bulletins, dealer notifications, and other communications that relate to this recall, including a copy of the final owner notification letter and any subsequent owner follow-up notification letter(s), are required to be submitted to this office no later than 5 days after they are originally sent (if they are sent to more than one manufacturer, distributor, dealer, or purchaser/owner).

As stated in Part 573.7, submission of the first of six consecutive quarterly status reports is required within one month after the close of the calendar quarter in which notification to purchasers occurs. Therefore, the first quarterly report will be due on, or before, 30 days after the close of the calendar quarter.
